RE: Entact's Alternate Approach to Cofferdam Liner Material & Reinforcement  
SCE&G Fleet Maintenance Site (Congaree River)  
Columbia, South Carolina

Dear Mr. Biery:

The Department received Entact's Alternate Approach to Cofferdam Liner Material & Reinforcement from Dominion Energy on May 18, 2022. The report describes the approach to use XR5 Geomembrane and Fabriform Unimat instead of the originally proposed 50-mil HDPE line and the 4-inch articulated concrete block (ACB) mats. Additionally, specification sheets for each of the products was included. The Department approves of the Alternate Approach to Cofferdam Liner Material and Reinforcement specified in the submittal.

If you have any questions, feel free to contact me at (803) 898-0910 or [cassidga@dhec.sc.gov](mailto:cassidga@dhec.sc.gov).

Sincerely,

Greg Cassidy, Project Manager  
State Voluntary Cleanup Program  
Division of Site Assessment, Remediation, and Revitalization  
Bureau of Land and Waste Management
