Conditional Approval of Draft Source Area Remediation Work Plan, dated November 4, 2022

Dear Mr. Underwood:

The South Carolina Department of Health and Environmental Control (the Department) has reviewed the Draft Source Area Remediation Work Plan ("Work Plan"). The Work Plan is approved with the following conditions:

1. The Work Plan is concise and general in nature, and calls for submission of specific operational plans for excavation and for oxidant addition. These plans should be provided to the Department for review and approval prior to implementation.
2. Once the operational plans have been finalized, your office should provide an updated schedule in allowing sufficient lead time for the Department to initiate public notice activities prior to starting the removal.
3. Airborne emissions/air pollution permitting are potentially an applicable or relevant and appropriate requirement. In order to determine whether a permit is needed DeMaximus should consult directly with the Department's Bureau of Air in determining the appropriate actions to be taken.

As always, you can reach me at 803-898-0733 or by email at hornostr@dhec.sc.gov if you would like to discuss this project.

Best Regards,

A handwritten signature in blue ink, appearing to read "Tim Hornosky".
