☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # _____.

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with _____mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # _____.
Time of preservation _____. If more than one preservative is needed, please note in the comments below.

Sample(s) _____ were received with bubbles >6 mm in diameter.

Samples(s) _____ were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: _____.

RE: **WPH CLEMSON**

Pace Workorder: 29274

Dear Lisa Clark:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, January 22, 2019. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Lauren E McGrath

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000002

Lab Report: 29274 Pace Analytical Energy Services
Twenty three groundwater samples and one groundwater field duplicate analyzed for dissolved hydrocarbon gases.

Chain of Custody, Sample Temperature, Sample Preservation: Chains of custody (CoCs) signed; sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples analyzed within hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Hydrocarbon gases were not detected in the method blanks.

Trip Blank: A trip blank was not collected with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries as well as RPDs are within QC Limits.

MS/MSD: MS/MSD analyses were not performed using samples included in this report.

Duplicates: DU-19105 is a field duplicate of DP-20A. Methane, ethane, and ethane were detected in both the parent and field duplicate samples. RPDs for methane, ethane, and ethene were 6.1% or less which is within the QC limit. No qualifiers were assigned.

No data qualifiers were assigned.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 29274 WPH CLEMSON

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Please rename the sample collected at 1420 to DP-24B.

Thank you,

David Szynal

Hi Terrance,

We received the samples for the project above. The COCs were not relinquished. Could you possibly scan a signed copy over so you can confirm the COC is correct?

Additionally, DP-27: the vials ID was DPT-27. DP-25B: the vials ID was DP-24B. Please confirm the correct sample IDs and if you can, a scanned copy that is relinquished.

Thank you

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000002

Lab Report: 29494 Pace Analytical Energy Services
Twelve groundwater samples were analyzed for dissolved hydrocarbon gases.

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (CoC) signed; sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples analyzed within hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Hydrocarbon gases were not detected in the method blanks.

Trip Blank: A trip blank was not collected with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries as well as RPDs are within QC Limits.

MS/MSD: MS/MSD analyses were not performed using samples included in this report.

Duplicates: A field duplicate was not collected with these samples.

Other: Note that the CoC was not signed by TRC staff.

No qualifiers were assigned.

Data review performed by: Terry Hertz; TRC Environmental Corp.; 2/27/2019

ANALYTICAL RESULTS QUALIFIERS

Workorder: 29494 WPH CLEMSON / 300688.0.0.2

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000002

Lab Report: UB15044 Shealy Environmental Services
Two groundwater samples were analyzed for volatile organic compounds (VOCs), chloride, bromide, sulfate, and nitrate. One trip blank was analyzed for VOCs.

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (CoC) signed; sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples analyzed within hold time.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Method blanks were free of detections.

Trip Blank: Trip blank TBLK-19113 had acetone detected at 2.0 J ug/L. **Acetone in MW-11 is assigned a "u" qualifier because the concentration (2.2 J ug/L) is comparable to the trip blank concentration.**

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for anions and VOCs are within QC Limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were not performed using samples included in his report.

Duplicates: A field duplicate was not collected with these samples.

Data review performed by: Terry Hertz; TRC Environmental Corp.; 2/27/2019

Case Narrative
TRC Companies, Inc.
Lot Number: UB15044

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 2 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☑ Yes	☐ No		21. Was the quote number listed on the container label? If yes, Quote # 21713

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) N/A were received incorrectly preserved and were adjusted accordingly in sample receiving with N/A mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # N/A. Time of preservation N/A. If more than one preservative is needed, please note in the comments below.

Sample(s) N/A were received with bubbles >6 mm in diameter.

Samples(s) N/A were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: N/A.

SR barcode labels applied by: MEC Date: 2-15-19

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000010

Lab Report: UK04055 Shealy Environmental Services
Twenty five groundwater samples were analyzed for bromide.

Chain of Custody, Sample Temperature, Sample Preservation: Chains of custody (CoCs) signed; sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples analyzed within hold time.

Surrogates: Surrogate recoveries are not relevant to bromide analyses.

Method Blank: Method blanks did not have bromide detections.

Trip Blank: A trip blank was not collected with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for bromide were within QC Limits. LCSD analyses were not performed.

MS/MSD: RMW-23A and RMW-23B were used for bromide MS/MSD analyses. Bromide MS and MSD recoveries and RPDs were within QC limits.

Duplicates: A field duplicate was not collected with these samples.

No qualifiers were assigned.

Data review performed by: Terry Hertz; TRC Environmental Corp.; 11/15/2019

Case Narrative
TRC Companies, Inc.
Lot Number: UK04055

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Case Narrative
TRC Companies, Inc.
Lot Number: UK11025

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000010

Lab Report: UK11024 Shealy Environmental Services
Nineteen groundwater samples were analyzed for bromide.

Chain of Custody, Sample Temperature, Sample Preservation: Chains of custody (CoCs) signed; sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples analyzed within hold time.

Surrogates: Surrogate recoveries are not relevant to bromide analyses.

Method Blank: Method blanks did not have bromide detections.

Trip Blank: A trip blank was not collected with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for bromide were within QC Limits. LCSD analyses were not performed.

MS/MSD: RMW-09, RMW-08A, and RMW-27B were used for bromide MS/MSD analyses. Bromide MS and MSD recoveries and RPDs were within QC limits except as follows:

- The RMW-08A bromide MS recovery was within the QC limits, but the corresponding MSD recovery was 1% above the upper QC limit. No qualifier was assigned.

Duplicates: A field duplicate was not collected with these samples.

No qualifiers were assigned.

Data review performed by: Terry Hertz; TRC Environmental Corp.; 11/25/2019

Case Narrative
TRC Companies, Inc.
Lot Number: UK11024

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Inorganic non-metals
The matrix spike duplicate (MSD) associated with sample -009 had bromide recovered outside of the acceptance limits. The laboratory control sample (LCS) was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Sample Receipt Checklist (SRC)

Client: TRC Cooler Inspected by/date: JSH / 11/11/19 Lot #: UK11024

Means of receipt: ☑ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Other: _____

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

3.0 / 3.0 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 5 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☐ No	☑ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☑ Yes	☐ No		21. Was the quote number listed on the container label? If yes, Quote # 21491

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA _____ were received with bubbles >6 mm in diameter.

Samples(s) NA _____ were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

SR barcode labels applied by: JSH Date: 11/11/19

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **VC10049** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33215**

Samples and Analyses: Three groundwater samples, collected 09-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples were analyzed within acceptable hold time.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: No target analytes were detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for bromide, chloride, sulfate, and VOCs using sample RMW-23B. MS and MSD recoveries and MS/MSD RPDs are within QC limits.

Duplicates: A field duplicate was not collected with these samples. No laboratory duplicate analyses were included.

Dilutions: Non-detect (ND) results were reported at elevated DLs and LOQs due to dilution (5×) in the VOCs analysis for sample RMW-23B. No other dilutions were associated with ND results.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 24-Mar-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC10049

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been submitted to Pace Energy for analysis. This data is found on Pace workorder 33215.

RE: **WPH CLEMSON / 300688.0.0.11**

Pace Workorder: 33215

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, March 12, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/20/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **33215** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC10049**.

Samples and Analyses: Three groundwater samples, collected 09-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples were analyzed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within QC limits.

MS/MSD: MS/MSD analyses were performed using sample RMW-23B. MS and MSD recoveries and MS/MSD RPDs are within QC limits.

Duplicates: A field duplicate was not collected with these samples.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 24-Mar-2020

PROJECT SUMMARY

Workorder: 33215 WPH CLEMSON / 300688.0.0.11

Workorder Comments

The container pH for samples 33215 (0001-0005) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33215 WPH CLEMSON / 300688.0.0.11

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Note: All samples are retained for four weeks from receipt unless other arrangements are made.

LAB USE ONLY
Received on Ice (Check) ☐ Y ☐ N ☐ Ice Pack
Receipt Temp. 1.1 °C

Cooler Receipt Form

Client Name: Shealy **Project:** 300688.0.0.11 **Lab Work Order:** 33215

A. **Shipping/Container Information** (circle appropriate response)

Courier: (FedEx) UPS USPS Client Other:_____ **Air bill Present:** (Yes) No

Tracking Number: 166334637121

Custody Seal on Cooler/Box Present: (Yes) No **Seals Intact:** (Yes) No

Cooler/Box Packing Material: (Bubble Wrap) Absorbent Foam Other:_____

Type of Ice: (Wet) Blue None **Ice Intact:** (Yes) Melted

Cooler Temperature: 1.1°C **Radiation Screened:** Yes (No) **Chain of Custody Present:** (Yes) No

Comments:_____

B. **Laboratory Assignment/Log-in** (check appropriate response)

	YES	NO	N/A	Comment Reference non-Conformance
Chain of Custody properly filled out	✓			
Chain of Custody relinquished	✓			
Sampler Name & Signature on COC			✓	
Containers intact	✓			
Were samples in separate bags	✓			
Sample container labels match COC Sample name/date and time collected	✓			
Sufficient volume provided	✓			
PAES containers used	✓			
Are containers properly preserved for the requested testing? (as labeled)	✓			
If an unknown preservation state, were containers checked? Exception: VOA's coliform			✓	If yes, see pH form.
Was volume for dissolved testing field filtered, as noted on the COC? Was volume received in a preserved container?			✓	
Headspace present?		✓		

Comments:_____

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **VC11080** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33226**

Samples and Analyses: Two groundwater samples, collected 10-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples were analyzed within acceptable hold time.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: No target analytes were detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS analysis was performed for VOCs using sample RMW-23C; MSD analysis was not performed. MS recoveries are within QC limits.

Duplicates: A field duplicate was not collected with these samples. No laboratory duplicate analyses were included.

Dilutions: ND results were reported at elevated DLs and LOQs due to dilution in the VOCs analysis for samples RMW-23C (5×) and RMW-23A (20×). No other dilutions were associated with ND results.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 25-Mar-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC11080

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for dissolved gasses has been performed by Pace Energy. This data is located on Pace Energy report 33226.

RE: **WPH CLEMSON / 300688.0.0.11**

Pace Workorder: 33226

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday, March 13, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/20/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **33226** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC10080**.

Samples and Analyses: Two groundwater samples, collected 10-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Samples were analyzed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within QC limits.

MS/MSD: MS/MSD analyses were not performed using a sample from this data set.

Duplicates: A field duplicate was not collected with these samples.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 25-Mar-2020

Workorder Comments

The container pH for samples 33226 (0001-0002) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33226 WPH CLEMSON / 300688.0.0.11

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **VC12037** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33266**

Samples and Analyses: Six groundwater samples and one field duplicate, collected 11-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: No target analytes were detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed only for VOCs, using sample RMW-14A. MS recoveries for cyclohexane and methyl acetate (both ND), and MS and MSD recoveries for tetrachloroethene (detected) are below the QC limits. MS/MSD RPDs are within QC limits. **In the RMW-14A results, cyclohexane and methyl acetate are assigned "uj" qualifiers, and tetrachloroethene is assigned a "j" qualifier due to low MS/MSD recoveries.**

Duplicates: A field duplicate sample (DU-20101) was collected for sample RMW-14B. RPDs were calculated for analytes detected above 5× the LOQ in both samples; absolute differences were used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and absolute differences were ≤ LOQ; therefore, results are in acceptable agreement.

Dilutions: ND results were reported at elevated DLs and LOQs due to dilution in the VOCs analysis of sample RMW-20A (2× dilution). No other dilutions were associated with ND results.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Apr-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC12037

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The continuing calibration verification (CCV) associated with batch 48012 recovered outside acceptance criteria for Dichlorodifluoromethane and Chloromethane . An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples are non-detect, no corrective action was taken.

Due to suspected matrix interferences, the MS associated with batch 47792 recovered Cyclohexane and Methyl Acetate marginally outside of method criteria. The associated MSD recovered these compounds marginally inside of method criteria. In addition, the MS/MSD recovered Tetrachloroethene below method criteria. The relative percent difference between the MS/MSD for all three compounds is within method criteria further demonstrating matrix interferences are impacting the recoveries.

Bromide/Chloride by IC

Due to the matrix interference of a nontarget analyte, sulfate, sample -003 has been analzyed at a dilution. The LOQs have been adjusted accordingly to reflect the dilution.

Dissolved Gasses

The analysis for dissolved gasses has been performed by Pace Energy. This data is found on report 33266.

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33266

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 17, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/27/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000.000011

Lab Report: **33266** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC12037**.

Samples and Analyses: Six groundwater samples and one field duplicate, collected 11-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within QC limits.

MS/MSD: MS/MSD analyses were not performed with samples from this data set.

Duplicates: A field duplicate sample (DU-20101) was collected for sample RMW-14B. The field duplicate analysis was based on the absolute difference since the only detected analyte (methane) was detected below 5× the LOQ in both samples. The absolute difference was ≤ LOQ; therefore, results are in acceptable agreement.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Apr-2020

PROJECT SUMMARY

Workorder: 33266 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33266 (0006-0007) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33266 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC13031** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33267**

Samples and Analyses: Five groundwater samples, collected 12-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: One target analyte was detected in the laboratory method blanks, as follows:

- Bromide (0.056 J mg/L) was detected in the method blank**. The positive results for bromide in samples RMW-13, RMW-06A, RMW-06, and RMW-20C are assigned "u" qualifiers (revised to ND) at the LOQ.** These results shall be considered ND based on method blank contamination.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for VOCs, bromide, chloride, and nitrate using sample RMW-06A. MS and MSD recoveries and MS/MSD RPDs are within QC limits, with the following exceptions:

- The MS and MSD recoveries for nitrate (detected) are below the QC limits. **The positive result for nitrate in sample RMW-06A is assigned a "j-" qualifier due to low MS/MSD recoveries.**

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: All dilutions in these analyses were associated with positive detects; no ND results were reported at elevated DLs and LOQs due to dilution.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC13031

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The continuing calibration verification (CCV) associated with analytical batch 48012 recovered outside acceptance criteriafor Dichlorodifluoromethane and Chloromethane. An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples are non-detect for these compounds, no corrective action was taken.

Bromide

The method blank and continuing calibration blanks for analytical batch 48673 yielded a "J" value detection for Bromide. The associated samples did not contain detections above the LOQ for the target analyte; therefore, re-extraction and/or re-analysis of samples was not performed. Associated detections have been qualified with a "B".

Nitrate

Due to suspected matrix interferences, the MS/MSD associated with batch 47904 recovered marginally below method criteria.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. The data for this analysis is found on Pace Energy report 33267.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☐ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H_2SO_4, HNO_3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33267

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 17, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/31/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33267** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC13031**.

Samples and Analyses: Five groundwater samples, collected 12-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using sample RMW-06A and using an "external" sample (not from this data set; external sample results are not relevant to this review). The MS and MSD recoveries and RPDs using sample RMW-06A are within the laboratory QC limits.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

PROJECT SUMMARY

Workorder: 33267 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33267 (0002-0006) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33267 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC17034** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33298**

Samples and Analyses: Two groundwater samples and one field duplicate, collected 16-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for VOCs using sample RMW-19A. MS and MSD recoveries and MS/MSD RPDs are within the QC limits.

Duplicates: A field duplicate sample (DU-20102) was collected for sample RMW-19. RPDs were calculated for analytes detected above 5× the LOQ in both samples; absolute differences (AbsDs) were used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsDs were ≤ LOQ; therefore, results are in acceptable agreement.

Dilutions: The VOCs analysis in sample RMW-19A was performed with a 10× dilution, and the associated ND results were reported with correspondingly elevated DL and LOQ values. All other dilutions in these analyses were associated with positive detects.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC17034

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The continuing calibration verification (CCV) associated with analytical batch 48194 recovered outside acceptance criteria, for (MTBE). An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect, no corrective action was taken.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33298.

RE: **WPH Clemson / TRC**

Pace Workorder: 33298

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, March 19, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/31/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33298** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC17034**.

Samples and Analyses: Two groundwater samples and one field duplicate, collected 16-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using sample RMW-06A and using an "external" sample, not from this data set. MS/MSD results for the external sample are not relevant to this review. The MS and MSD recoveries and RPDs are within the laboratory QC limits.

Duplicates: A field duplicate sample (DU-20102) was collected for sample RMW-19. Methane and ethane were ND in both samples. Ethene was detected at concentrations below the LOQ in both samples, and the absolute difference (AbsD) between the results was ≤ LOQ; therefore, results are in acceptable agreement.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

PROJECT SUMMARY

Workorder: 33298 WPH Clemson / TRC

Workorder Comments

The container pH for samples 33298 (0001-0003) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33298 WPH Clemson / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC18025** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33306**

Samples and Analyses: Two groundwater samples, collected 17-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: No MS/MSD analyses were performed with these samples.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: The VOC analyses in samples RMW-21A and RMW-21 were performed with dilution (50× and 5×, respectively), and the ND results were reported with correspondingly elevated DL and LOQ values. All other dilutions in these analyses were associated with positive results (detects).

No data qualifiers are assigned based on this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC18025

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

Due to the large number of spiked analytes, there is a high probability that one or more analytes will recover outside acceptance limits. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria. The following analytes recovered marginally outside LCS criteria in batch 48343: Bromoform and Meythyl tertiary butyl ether.

The continuing calibration verification (CCV) associated with analytical batch 48343 recovered outside acceptance criteria for Bromomethane, MTBE, Bromoform, 1,2-dibromo-3-chloropropene. An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples are non-detect, no corrective action was taken.

Bromide

The following sample was diluted due to the nature of the sample matrix: VC18025-002. The LOQ has been elevated to reflect the dilution.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33306.

RE: **WPH Clemson / TRC**

Pace Workorder: 33306

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday, March 20, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 03/31/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33306** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC18025**.

Samples and Analyses: Two groundwater samples, collected 17-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: No MS/MSD analyses were performed with this sample set.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 28-Sep-2020

Workorder Comments

The container pH for samples 33306 (0001-0002) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33306 WPH Clemson / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC19029** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33327**

Samples and Analyses: Four groundwater samples, collected 18-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for VOCs, bromide, chloride, and sulfate using sample RMW-08. MS and MSD recoveries and MS/MSD RPDs are within QC limits, with the following exceptions:

- The MS recoveries for acetone, bromomethane, and 2-butanone, and the MSD recoveries for acetone and bromomethane are below the QC acceptance limits. **The ND results for acetone, bromomethane, and 2-butanone in sample RMW-08 are assigned a "uj" qualifier due to low MS/MSD recoveries.**

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: The VOC analysis in sample RMW-08 was performed with dilution (5×), and the associated ND results are reported with correspondingly elevated DL and LOQ levels. All other dilutions in these samples were associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 29-Sep-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC19029

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The continuing calibration verification (CCV) associated with analytical batch 48465 recovered outside acceptance criteria for Bromomethane and Acetone. An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples are non-detect, no corrective action was taken.

The MS associated with batch 48465 recovered three compounds marginally outside of method criteria due to suspected matrix interferences. In addition, the MSD associated with this batch recovered two compounds marginally outside of method criteria due to suspected matrix interferences.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33327.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

RE: **WPH Clemson / TRC**

Pace Workorder: 33327

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 24, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/06/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33327** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC19029.**

Samples and Analyses: Four groundwater samples collected 18-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using an "external" sample, not from this data set, and are therefore not relevant to this review.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 29-Sep-2020

Workorder Comments

The container pH for samples 33327 (0001-0004) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33327 WPH Clemson / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC20025** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted job: **33333**

Samples and Analyses: Four groundwater samples, collected 19-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for VOCs, bromide, chloride, nitrate and sulfate using sample RMW-10A; and MS/MSD analyses were also performed for VOCs using sample RMW-10. MS/MSD recoveries and RPDs are within QC limits, with the following exceptions:

- Using sample RMW-10A, the MS recoveries for acetone, 2-butanone, and methyl acetate, and the MSD recovery for acetone are below the QC acceptance limits. **The ND results for acetone, 2-butanone, and methyl acetate in sample RMW-10A are assigned a "uj" qualifier due to low MS/MSD recoveries.**

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: The VOC analyses in samples RMW-10 and RMW-10A were performed with dilution (5× in both), and the associated ND results are reported with correspondingly elevated DL and LOQ levels. All other dilutions in these samples were associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC20025

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The continuing calibration verification (CCV) associated with analytical batch 48604 recovered outside acceptance criteria for Bromomethane. An LOQ standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect, no corrective action was taken.

Due to suspected matrix interferences, the MS associated with batch 48604 recovered three compounds marginally outside of method criteria and the MSD recovered one compound marginally outside of method criteria.

Bromide

The following sample was diluted due to the nature of the sample matrix: VC20025-002. The LOQ has been elevated to reflect the dilution.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33333.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

1,1,2-Trichloro-1,2,2-Trifluoroethane	76-13-1	8260D	ND		1.0	0.42	ug/L	1
1,2,4-Trichlorobenzene	120-82-1	8260D	ND		1.0	0.40	ug/L	1
1,1,1-Trichloroethane	71-55-6	8260D	ND		1.0	0.40	ug/L	1
1,1,2-Trichloroethane	79-00-5	8260D	ND		1.0	0.40	ug/L	1

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33333

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 24, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/06/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33333** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC20025**.

Samples and Analyses: Four groundwater samples collected 19-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using sample RMW-10A. MS and MSD recoveries and MS/MSD RPDs are within the laboratory QC limits

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

PROJECT SUMMARY

Workorder: 33333 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33333 (0001-0002) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33333 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Emma Louis - RE: WPH Clemson Samples

From: Lucas Odom <lodom@shealylab.com>
To: Emma Louis <Emma.Louis@pacelabs.com>
Date: 3/24/2020 4:18 PM
Subject: RE: WPH Clemson Samples

Sorry about that.
Here are the correct times:
RMW-10: 03/19 @ 1050 (I bet the "5" just looks like a "3" on the vial)
RMW-10B: 03/19 @ 1100
RMW-10A: 03/19 @ 1340
RMW-10C: 03/19 @ 1510

Thanks,

Lucas Odom
Project Manager
Pace Analytical Services, LLC

From: Emma Louis <Emma.Louis@pacelabs.com>
Sent: Tuesday, March 24, 2020 4:12 PM
To: Lucas Odom <lodom@shealylab.com>
Subject: RE: WPH Clemson Samples

Another thing-

Sample receiving noted the vial times were different than what was listed on the COC.

RMW-10: vials time was 10:30, while COC states 11:45
RMW-10B: vials time was 11:00, while COC states 12:00
RMW-10A: vials time was 13:40, while the COC states 14:45
RMW-10C: vials time was 15:10, while the COC states 15:20

Please confirm the correct times of collection.

Thank you

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC24028** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33353**

Samples and Analyses: Six groundwater samples, collected 23-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for nitrate using sample DP-27A, and for VOCs using sample DP-27. MS/MSD recoveries and RPDs are within QC limits, with the following exceptions:

- Using sample DP-27, the MSD recoveries for acetone and 2-butanone are below the QC acceptance limits. **The ND results for acetone and 2-butanone in sample DP-27 are assigned a "uj" qualifier due to low MS/MSD recoveries.**

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: The following VOC analyses were performed with dilution (as indicated): DP-27 (10×), DP-27A (5×), DP-27B (5×), DP-26 (5×), DP-26A (5×), and DP-26B (50×). The ND results in these samples are reported with correspondingly elevated DL and LOQ levels. All other dilutions in these samples were associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC24028

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

Due to suspected matrix interferences, the MSD associated with batch 48900 recovered two compounds marginally outside of method criteria. These compounds were recovered marginally within criteria for the MS.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data is located on Pace Energy report 33353.

Report Revision 10/07/20

Due to an import error, the Nitrate analysis times that were performed prior to 10:00 were not originally documented. These times have now been included.

RE: **WPH Clemson / TRC**

Pace Workorder: 33353

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, March 26, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/08/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33353** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC24028**.

Samples and Analyses: Four groundwater samples collected 23-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using a sample from another dataset; the results are not relevant to this review.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Workorder Comments

The container pH for samples 33353 (0001, 0004) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33353 WPH Clemson / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

If an unknown preservation state, were containers checked? Exception: VOA's coliform			✓	If yes, see pH form.
Was volume for dissolved testing field filtered, as noted on the COC? Was volume received in a preserved container?			✓	
Headspace present?		✓

Report of Analysis

TRC Companies, Inc.
50 International Dr.
Suite 150
Greenville, SC 29615
Attention: Lisa Clark

Project Name: WPH Clemson

Project Number: 300688.0000.0000.00011

Lot Number:**VC24033**

Date Completed:10/05/2020
Revision Date: 10/05/2020

10/07/2020 9:30 AM
Approved and released by:
Project Manager II: **Lucas Odom**

The electronic signature above is the equivalent of a handwritten signature.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC24033** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33354**

Samples and Analyses: Six groundwater samples, collected 23-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for bromide, chloride, and sulfate using sample RMW-05A. MS/MSD recoveries and RPDs are within QC limits.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: All dilutions performed in these sample analyses were associated with positive results (detects); no ND results are associated with elevated DLs and LOQs due to dilution.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC24033

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33354.

Report Revision 10/07/20

Due to an import error, the Nitrate analysis times that were performed prior to 10:00 were not originally documented. These times have now been included.

☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼" or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

RE: **WPH Clemson / TRC**

Pace Workorder: 33354

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, March 26, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/07/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33354** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC24033**.

Samples and Analyses: Four groundwater samples collected 23-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed with this sample set.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Workorder Comments

The container pH for samples 33354 (0001-0004) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33354 WPH Clemson / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC25036** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33367**

Samples and Analyses: Two groundwater samples, collected 24-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were not performed using samples from this data set.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: All dilutions performed in these sample analyses were associated with positive results (detects); no ND results are associated with elevated DLs and LOQs due to dilution.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC25036

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. The associated results are on Pace Energy report 33367.

Report Revision 10/07/20

Due to an import error, the Nitrate analysis times that were performed prior to 10:00 were not originally documented. These times have now been included.

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33367

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday, March 27, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/10/2020

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33367** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC25036**.

Samples and Analyses: Two groundwater samples collected 24-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed using samples from this data set.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 01-Oct-2020

Workorder Comments

The container pH for samples 33367 (0001-0002) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33367 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC25037** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33366**

Samples and Analyses: Three groundwater samples, collected 24-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times, with one exception:

- The nitrate analysis in sample DP-25 was performed outside the 48-hour hold time limit for that method. **The positive result for nitrate in sample DP-25 is qualified "j-" due to analysis past the method hold time limit.**

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses for nitrate were performed using sample DP-25, and MS/MSD analyses for bromide, chloride, and sulfate were performed using sample DP-25B. MS and MSD recoveries and MS/MSD RPDs are within QC limits.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: The ND results for the VOC analyses in these samples are associated with elevated DLs and LOQs due to dilution (as indicated): DP-25A (5×), DP-25B (5×). All other dilutions performed in these sample analyses were associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC25037

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Nitrate

To ensure the 48 hour hold time was met, sample -001 was analyzed before its associated MB and LCS. This sample was reanalyzed outside of the hold time just after MB/LCS injections to confirm the result. The in hold run has been reported.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33366.

Report Revision 10/07/20

Due to an import error, the Nitrate analysis times that were performed prior to 10:00 were not originally documented. These times have now been included.

1,1,2-Trichloro-1,2,2-Trifluoroethane	76-13-1	8260D	3.8	J	5.0	2.1	ug/L	2
1,2,4-Trichlorobenzene	120-82-1	8260D	ND		5.0	2.0	ug/L	2
1,1,1-Trichloroethane	71-55-6	8260D	ND		5.0	2.0	ug/L	2

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

Parameter	CAS Number	Analytical Method	Result	Q	LOQ	DL	Units	Run
Trichloroethene	79-01-6	8260D	ND		1.0	0.40	ug/L	1
Trichlorofluoromethane	75-69-4	8260D	ND		1.0	0.40	ug/L	1
Vinyl chloride	75-01-4	8260D	ND		1.0	0.40	ug/L	1
Xylenes (total)	1330-20-7	8260D	ND		1.0	0.40	ug/L	1

Surrogate	Q	Run 1 % Recovery	Acceptance Limits
Bromofluorobenzene		100	70-130
1,2-Dichloroethane-d4		121	70-130
Toluene-d8		110	70-130

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

Sample Receipt Checklist (SRC)

Client: TRC Cooler Inspected by/date: LKH / 03/25/2020 Lot #: VC25037

Means of receipt: ☑ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Other:

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

4.1 /4.1 °C NA /NA °C NA /NA °C NA /NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H_2SO_4, HNO_3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33366

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday, March 27, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/10/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33366** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC25037**.

Samples and Analyses: Three groundwater samples collected 24-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed using samples from this data set.

Duplicates: No field duplicate sample was collected with this sample set. No laboratory duplicates were included with these analyses.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Workorder Comments

The container pH for samples 33366 (0001-0003) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33366 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC26030** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33392**

Samples and Analyses: Nine groundwater samples and one field duplicate, collected 25-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses for nitrate were performed using sample DUP-20104, and for VOCs using samples DP-24 and DP-24B. MS and MSD recoveries and MS/MSD RPDs are within QC limits, with the following exceptions:

- The MS and MSD recoveries for nitrate in sample DUP-20104 were below the QC criteria. **The positive result for nitrate in sample DUP-20104 is qualified "j-" due to low MS/MSD recoveries.**
- The sample DP-24 MS recoveries for multiple (13) VOCs were above the QC criteria. Qualification action for high MS/MSD recovery is applied only for positive results; therefore, no qualifiers are applied for these VOCs that were ND in sample DP-24. **The positive results for PCE and TCE in sample DR-24 are qualified "j+" due to high MS recoveries.**

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20104) was collected for sample DP-23A. RPDs were calculated for analytes detected above 5× the LOQ in both samples; absolute differences (AbsDs) were used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsDs were ≤ LOQ; therefore, results are in acceptable agreement and no qualification action was needed.

Dilutions: The primary VOC analyses in the following samples were performed with dilution (as indicated): DP-24 (5×), DP-24A (20×), DP-23A (20×), DP-22A (50×), DP-22B (10×), and DUP-20104 (20×). ND results for the VOC analyses in these samples are associated with elevated DLs and LOQs due to dilution. All other dilutions performed in these sample analyses were associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC26030

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Nitrate

Due to suspected matrix interferences, the MS/MSD associated with batch 49091 recovered Nitrate at 82% and 87% respectively.

VOCs by GC/MS

The MS associated with batch 49316 recovered multiple compounds marginally outside of method criteria due to suspected matrix interferences. The MSD recovered all of these compounds within method criteria, but was within the relative percent difference range with the MS.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. The data for this parameter is found on Pace Energy report 33392.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

Sample Receipt Checklist (SRC)

Client: TRC Cooler Inspected by/date: LKH / 03/26/2020 Lot #: VC26030

Means of receipt: ☑ SESI ☐ Client ☐ UPS ☐ FedEx ☐ Other: _____

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

2.3 / 2.3 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc...) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H_2SO_4, HNO_3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

SR barcode labels applied by: LKH Date: 03/26/2020

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33392

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 31, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/13/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33392** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC26030**.

Samples and Analyses: Nine groundwater samples and one field duplicate collected 25-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed using samples from this data set.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20104) was collected for sample DP-23A. The RPD is appropriate for evaluation of duplicate results only when both results are ≥ 5× the LOQ. The absolute difference (AbsD) was used to evaluate the field duplicate results since each analyte had both concentrations below 5× the LOQ. AbsDs were ≤ LOQ; therefore, results are in acceptable agreement, and no qualification action was needed.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

PROJECT SUMMARY

Workorder: 33392 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33392 (0001, 0004, 0007-0010) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33392 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

LAB USE ONLY
Received on Ice (Check) ☐ Y ☐ N ☐ Ice Pack

Receipt Temp. 0.3 °C

Cooler Receipt Form

Client Name: Pace **Project:** WPH Clemson **Lab Work Order:** 33392

A. **Shipping/Container Information** (circle appropriate response)

Courier: (FedEx) UPS USPS Client Other:_____ **Air bill Present:** (Yes) No

Tracking Number: 166334637750

Custody Seal on Cooler/Box Present: (Yes) No **Seals Intact:** (Yes) No

Cooler/Box Packing Material: (Bubble Wrap) Absorbent Foam Other:_____

Type of Ice: (Wet) Blue None **Ice Intact:** (Yes) Melted

Cooler Temperature: 0.3°C **Radiation Screened:** Yes (No) **Chain of Custody Present:** (Yes) No

Comments:_____

B. **Laboratory Assignment/Log-in** (check appropriate response)

	YES	NO	N/A	Comment Reference non-Conformance
Chain of Custody properly filled out	✓			
Chain of Custody relinquished	✓			
Sampler Name & Signature on COC			✓	
Containers intact	✓			
Were samples in separate bags	✓			
Sample container labels match COC Sample name/date and time collected	✓			
Sufficient volume provided	✓			
PAES containers used	✓			
Are containers properly preserved for the requested testing? (as labeled)	✓			
If an unknown preservation state, were containers checked? Exception: VOA's coliform			✓	If yes, see pH form.
Was volume for dissolved testing field filtered, as noted on the COC? Was volume received in a preserved container?			✓	
Headspace present?		✓		

Comments:_____

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC26035** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33393**

Samples and Analyses: Four groundwater samples and one field duplicate, collected 25-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses for bromide, chloride, and sulfate were performed using sample RMW-28A. MS and MSD recoveries and MS/MSD RPDs are within QC limits.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20103) was collected for sample RMW-28B. RPDs were calculated for analytes detected above 5× the LOQ in both samples; absolute differences (AbsDs) were used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsDs were ≤ LOQ; therefore, results are in acceptable agreement, and no qualification action was needed.

Dilutions: The primary VOC analyses in the following samples were performed with dilution (as indicated): RMW-28B (20×), and DUP-20103 (20×). ND results for the VOC analyses in these samples are associated with elevated DLs and LOQs due to dilution. All other dilutions performed in these sample analyses were associated with positive results (detects).

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC26035

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. The data for this analysis can be found on Pace Energy report 33393.

☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33393

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 31, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/13/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33393** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC26035**.

Samples and Analyses: Four groundwater samples and one field duplicate collected 25-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed using samples from this data set.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20103) was collected for sample RMW-28B. The RPD is appropriate for evaluation of duplicate results only when both results are ≥ 5× the LOQ. The absolute difference (AbsD) was used to evaluate the field duplicate results since each analyte had both concentrations below 5× the LOQ. AbsDs were ≤ LOQ; therefore, results are in acceptable agreement, and no qualification action was needed.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

LABORATORY ACCREDITATIONS & CERTIFICATIONS

Accreditor:	Pennsylvania Department of Environmental Protection, Bureau of Laboratories
Accreditation ID:	02-00538
Scope:	NELAP Non-Potable Water
Accreditor:	West Virginia Department of Environmental Protection, Division of Water and Waste Management
Accreditation ID:	395
Scope:	Non-Potable Water
Accreditor:	South Carolina Department of Health and Environmental Control, Office of Environmental Laboratory Certification
Accreditation ID:	89009003
Scope:	Clean Water Act (CWA); Resource Conservation and Recovery Act (RCRA)
Accreditor:	State of Virginia
Accreditation ID:	460201
Scope:	Non-Potable Water
Accreditor:	NELAP: New Jersey, Department of Environmental Protection
Accreditation ID:	PA026
Scope:	Non-Potable Water
Accreditor:	NELAP: New York, Department of Health Wadsworth Center
Accreditation ID:	11815
Scope:	Non-Potable Water
Accreditor:	State of Connecticut, Department of Public Health, Division of Environmental Health
Accreditation ID:	PH-0263
Scope:	Clean Water Act (CWA) Resource Conservation and Recovery Act (RCRA)
Accreditor:	NELAP: Texas, Commission on Environmental Quality
Accreditation ID:	T104704453-09-TX
Scope:	Non-Potable Water
Accreditor:	State of New Hampshire
Accreditation ID:	299409
Scope:	Non-potable water
Accreditor:	State of Georgia
Accreditation ID:	Chapter 391-3-26
Scope:	As per the Georgia EPD Rules and Regulations for Commercial Laboratories, PAES is accredited by the Pennsylvania Department of Environmental Protection Bureau of Laboratories under the National Environmental Laboratory Approval Program (NELAC).

PROJECT SUMMARY

Workorder: 33393 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33393 (0001-0005) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33393 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC27020** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33390**

Samples and Analyses: Six groundwater samples and one field duplicate, collected 26-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses for bromide, chloride, and sulfate were performed using sample DP-20, and for VOCs (PCE only) using sample DP-20B. MS and MSD recoveries and MS/MSD RPDs are within QC limits.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20105) was collected for sample DP-20A. RPDs were calculated for analytes detected above 5× the LOQ in both samples; absolute differences (AbsDs) were used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsDs were ≤ LOQ; therefore, results are in acceptable agreement, and no qualification action was needed.

Dilutions: The primary VOC analyses in the following samples were performed with dilution (as indicated): DP-21A (20×), DP-20 (5×), DP-20A (50×), and DUP-20105 (20×). ND results for the VOC analyses in these samples are associated with elevated DLs and LOQs due to dilution. All other dilutions performed in these sample analyses were associated with positive results.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC27020

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data is located on Pace Energy report 33390.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

Volatile Organic Compounds by GC/MS

Client: TRC Companies, Inc.
Laboratory ID: VC27020-008
Description: DU-20105
Matrix: Aqueous
Date Sampled: 03/26/2020
Date Received: 03/27/2020

Run	Prep Method	Analytical Method	Dilution	Analysis Date	Analyst	Prep Date	Batch
1	5030B	8260D	50	03/30/2020 0115	ALR1		49315

Parameter	CAS Number	Analytical Method	Result	Q	LOQ	DL	Units	Run
Trichloroethene	79-01-6	8260D	ND		50	20	ug/L	1
Trichlorofluoromethane	75-69-4	8260D	ND		50	20	ug/L	1
Vinyl chloride	75-01-4	8260D	ND		50	20	ug/L	1
Xylenes (total)	1330-20-7	8260D	ND		50	20	ug/L	1

Surrogate	Q	Run 1 % Recovery	Acceptance Limits
Bromofluorobenzene		85	70-130
1,2-Dichloroethane-d4		89	70-130
Toluene-d8		88	70-130

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33390

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 31, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/13/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33390** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC27020**.

Samples and Analyses: Four groundwater samples and one field duplicate collected 26-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed with this data set.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate sample (DU-20105) was collected for sample DP-20A. The RPD is appropriate for evaluation of duplicate results only when both results are ≥ 5× the LOQ. The absolute difference (AbsD) was used to evaluate the field duplicate results since each analyte had both concentrations below 5× the LOQ. AbsDs were ≤ LOQ; therefore, results are in acceptable agreement, and no qualification action was needed.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

PROJECT SUMMARY

Workorder: 33390 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33390 (0001-0002) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33390 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC27021** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33391**

Samples and Analyses: Three groundwater samples, collected 26-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for nitrate using sample MG-06B. The MS and MSD recoveries and MS/MSD RPD are within QC criteria.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: No dilutions were performed in these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC27021

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. The data for this analysis can be found on Pace Energy report 33391.

1,2,4-Trichlorobenzene	120-82-1	8260D	ND		1.0	0.40	ug/L	1
1,1,1-Trichloroethane	71-55-6	8260D	ND		1.0	0.40	ug/L	1
1,1,2-Trichloroethane	79-00-5	8260D	ND		1.0	0.40	ug/L	1

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33391

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Tuesday, March 31, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/13/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33391** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC27021**.

Samples and Analyses: Three groundwater samples, collected 26-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were not performed using a sample from this data set.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33391 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VC31032** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33403**

Samples and Analyses: Two groundwater samples, collected 30-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for bromide, nitrate, and VOCs using sample RMW-18. The MS and MSD recoveries and MS/MSD RPDs are within QC criteria, with these exceptions:

- The MS and MSD recoveries for nitrate in sample RMW-18 are below the QC limits. In this case, however, the nitrate concentration (3.3 mg/L) in sample RMW-18 is > 4× the MS/MSD spike concentration (0.8 mg/L), which causes the MS/MSD results to be unreliable and unusable for sample qualification. Validation action is not appropriate.
- The MS and MSD recoveries for bromomethane in the VOCs analysis are above the QC limits. Qualification is applied only to positive results (detects) when MS/MSD recoveries are high. Bromomethane is ND in sample RMW-18; therefore, no qualification action is required.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: No dilutions were performed in these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VC31032

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Nitrate

Due to suspected matrix interferences, the MS/MSD associated with batch 49692 recovered outside of method criteria at 72% and 81% respectively.

VOCs by GC/MS

Due to suspected matrix interferences, the MS/MSD associated with batch 49784 recovered Bromomethane outside of method criteria at 136% and 132% respectively.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Energy. This data can be found on Pace Energy report 33403.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33403

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, April 02, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/15/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33403** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VC31032**.

Samples and Analyses: Two groundwater samples, collected 30-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: A rinsate blank was not collected with these samples.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using sample RMW-18. The MS and MSD recoveries and MS/MSD RPDs are within the QC limits.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

PROJECT SUMMARY

Workorder: 33403 WPH CLEMSON / TRC

Workorder Comments

The container pH for samples 33403 (0001) were measured as below the expected pH (< 10) for those samples preserved with trisodium phosphate, as assigned to PAES method AM20GAx.

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33403 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **VD01033** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.); West Columbia, SC; subcontracted report: **33410**

Samples and Analyses: Four groundwater samples, one equipment rinsate blank, and one trip blank; collected 31-Mar-2020 and analyzed for VOCs, chloride, bromide, sulfate, and nitrate; one trip blank, analyzed for VOCs only

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed; sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly.

Hold Time: Sample analyses were performed within acceptable hold times, with the exception of the nitrate analysis in sample RMW-02, which was analyzed 5 minutes past the 48-hour hold time limit. **The positive result for nitrate in sample RMW-02 is qualified "j" due to analysis past the hold time limit.** Low bias is generally applied for analyses performed past the hold time limit, but this result is also qualified "j" due to MS/MSD recovery and RPD nonconformances; the combined qualification is "j", with no bias.

Surrogates: VOC surrogate recoveries are within QC limits.

Method Blank: Target analytes were not detected in the laboratory method blanks.

Trip Blank: No target analytes were detected in the trip blank; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: No target analytes were detected in the equipment rinse blank.

LCS/LCSD: LCS recoveries for all analyses are within QC limits. LCSD analyses were not performed.

MS/MSD: MS/MSD analyses were performed for nitrate and VOCs using sample RMW-02. The MS and MSD recoveries and MS/MSD RPDs are within QC criteria, with the exception of the following:

- The MS recovery for nitrate in sample RMW-02 is below the QC limits, and the MSD recovery is above the QC limits. The MS/MSD RPD is above the QC limit. **The positive result for nitrate in sample RMW-02 is qualified "j" due to these MS/MSD nonconformances.** Note that this result is also qualified "j" due to analysis past the hold time limit.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: The sulfate analysis in sample RMW-20B was performed with a dilution of 5×, and the VOC analyses in samples RMW-27 and RMW-02 were both performed with 10× dilution. The ND

results for these analyses are associated with correspondingly elevated DL and LOQ values. Other dilutions performed in the analyses for this data set are associated with positive results (detects).

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

Case Narrative
TRC Companies, Inc.
Lot Number: VD01033

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Pace Analytical Services, LLC ("Pace") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Pace policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Sulfate

The following sample was diluted due to the nature of the sample matrix: VD01033-003. The LOQ has been elevated to reflect the dilution.

Nitrate

Sample -006 was initially analyzed within the 48 hour hold time at a 5X dilution and yielding a value of 0.67 mg/L. The MS/MSD performed on this run yielded recoveries of 70% and 133% respectively. An additional, out of hold, run was performed at a 10X dilution yielding a detection of 0.31 mg/L. The out of hold run has been reported.

Dissolved Gasses

The analysis for Dissolved Gasses has been Performed by Pace Energy. This data can be found on Pace Energy report 33410.

Report Revision 10/07/20

Due to an import error, the Nitrate analysis times that were performed prior to 10:00 were not originally documented. These times have now been included.

QC Summary

Inorganic non-metals - MB

Sample ID: VQ49766-001
Batch: 49766
Analytical Method: 353.2

Matrix: Aqueous

Parameter	Result	Q	Dil	LOQ	DL	Units	Analysis Date
Nitrate - N	ND		1	0.020	0.010	mg/L	04/02/2020 0752

LOQ = Limit of Quantitation
DL = Detection Limit

ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria

N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Inorganic non-metals - LCS

Sample ID: VQ49766-002
Batch: 49766
Analytical Method: 353.2

Matrix: Aqueous

Parameter	Spike Amount (mg/L)	Result (mg/L)	Q	Dil	% Rec	% Rec Limit	Analysis Date
Nitrate - N	0.80	0.78		1	97	90-110	04/02/2020 0753

LOQ = Limit of Quantitation
DL = Detection Limit
ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Inorganic non-metals - MB

Sample ID: VQ49769-001
Batch: 49769
Analytical Method: 353.2

Matrix: Aqueous

Parameter	Result	Q	Dil	LOQ	DL	Units	Analysis Date
Nitrate - N	ND		1	0.020	0.010	mg/L	04/02/2020 0838

LOQ = Limit of Quantitation
DL = Detection Limit

ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria

N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Inorganic non-metals - LCS

Sample ID: VQ49769-002
Batch: 49769
Analytical Method: 353.2

Matrix: Aqueous

Parameter	Spike Amount (mg/L)	Result (mg/L)	Q	Dil	% Rec	% Rec Limit	Analysis Date
Nitrate - N	0.80	0.77		1	96	90-110	04/02/2020 0840

LOQ = Limit of Quantitation
DL = Detection Limit
ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Inorganic non-metals - MS

Sample ID: VD01033-006MS
Batch: 49769
Analytical Method: 353.2
Matrix: Aqueous

Parameter	Sample Amount (mg/L)	Spike Amount (mg/L)	Result (mg/L)	Q	Dil	% Rec	% Rec Limit	Analysis Date
Nitrate - N	0.67	0.80	1.2	N	5	70	90-110	04/02/2020 0926

LOQ = Limit of Quantitation
DL = Detection Limit
ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Inorganic non-metals - MSD

Sample ID: VD01033-006MD
Batch: 49769
Analytical Method: 353.2

Matrix: Aqueous

Parameter	Sample Amount (mg/L)	Spike Amount (mg/L)	Result (mg/L)	Q	Dil	% Rec	% RPD	% Rec Limit	% RPD Limit	Analysis Date
Nitrate - N	0.67	0.80	1.7	N,+	5	133	34	90-110	20	04/02/2020 0928

RE: **WPH CLEMSON / TRC**

Pace Workorder: 33410

Dear Lucas Odom:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday, April 03, 2020. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Ruth Welsh 04/15/2020

CERTIFICATE OF ANALYSIS

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 4

Lab Report: **33410** Pace Analytical Energy Services LLC; Pittsburgh, PA
This lab report is the subcontracted job related to **VD01033**.

Samples and Analyses: Four groundwater samples, collected 31-Mar-2020 and analyzed for dissolved hydrocarbon gases (methane, ethane, ethene)

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody was signed (sample transfer from Pace Analytical, Columbia, to Pace Analytical, Pittsburgh); sample temperature was <6 ^{o}C upon arrival at the laboratory; samples were preserved properly. Headspace was noted in some of the vials; however, no validation action was required on this basis.

Hold Time: Sample analyses were performed within acceptable hold time.

Surrogates: Surrogate recoveries are not applicable to dissolved hydrocarbon gas analyses.

Method Blank: Target analytes were not detected in the laboratory method blank.

Trip Blank: A trip blank was not analyzed with these samples.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: The rinsate blank was not analyzed for dissolved gases.

LCS/LCSD: LCS and LCSD recoveries and LCS/LCSD RPDs are within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed using a sample from another data set; results are not relevant to this review.

Duplicates: No laboratory duplicates were included with these analyses. No field duplicate sample was collected with this data set.

Dilutions: No dilutions were performed with these sample analyses.

No data qualifiers were assigned in this review.

Data reviewer: Amy Bass; TRC Environmental Corporation; 02-Oct-2020

ANALYTICAL RESULTS QUALIFIERS

Workorder: 33410 WPH CLEMSON / TRC

DEFINITIONS/QUALIFIERS

MDL	Method Detection Limit. Can be used synonymously with LOD; Limit Of Detection.
PQL	Practical Quanitation Limit. Can be used synonymously with LOQ; Limit Of Quantitation.
ND	Not detected at or above reporting limit.
DF	Dilution Factor.
S	Surrogate.
RPD	Relative Percent Difference.
% Rec	Percent Recovery.
U	Indicates the compound was analyzed for, but not detected at or above the noted concentration.
J	Estimated concentration greater than the set method detection limit (MDL) and less than the set reporting limit (PQL).
n	The laboratory does not hold NELAP/TNI accreditation for this method or analyte.

Lab Report: **WC12066** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221031719** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Six groundwater samples (plus one field duplicate), collected 11-Mar-2021 and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory noted that 1 vial (of 3) was received broken for each of two samples: RMW-10 and RMW-10C. Analyses were performed using the 2 remaining vials for each sample.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Methane (2.5 J µg/L) was detected in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases in all samples. **The positive results for methane in samples RMW-10A, RMW-10B, RMW-28B, and DU-21101 were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and are therefore potential false positives; these results were qualified "u" (revised to non-detect [ND]) at the laboratory LOQ, based on the associated laboratory method blank contamination.** Qualification was not required for the positive result for methane in sample RMW-10 since this result was significantly higher than (>5×) the method blank concentration, and qualification was not required for the ND results in the remaining samples (RMW-10C and RMW-28A).

Trip Blank: No target analytes were detected in the TB; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide and sulfate using sample RMW-10A, and MS/MSD analyses were performed for VOCs using sample RMW-10. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS and MSD recoveries for bromomethane and vinyl chloride in sample RMW-10 were below the QC limits. **The ND results for bromomethane and vinyl chloride in sample RMW-10 was qualified "uj" (estimated LOQ) due to the low MS/MSD recoveries.**

- The MS/MSD RPD for acetone in sample RMW-10 was above the QC limit. Qualification was not required on this basis since acetone was ND in sample RMW-10.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was collected for sample RMW-10C. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, results are in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-10	bromide (5×), sulfate (10×), VOCs (5×)
RMW-10A	VOCs (10×)
RMW-28B	VOCs (50×)
RMW-28A	VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target (or non-target) analytes into the appropriate instrument calibration range. The ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values. The noted bromide and sulfate dilutions are associated only with positive results (detects).

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 24-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC12066 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-10A	methane	2.7 J [5.0]	u (@LOQ)	< 5.0	MB
RMW-10B		2.6 J [5.0]	u (@LOQ)	< 5.0	
RMW-28B		4.0 J [5.0]	u (@LOQ)	< 5.0	
DU-21101		2.6 J [5.0]	u (@LOQ)	< 5.0	
RMW-10	bromomethane	ND [10]	uj	< 10 uj	low MS recovery
	vinyl chloride	ND [5.0]	uj	< 5.0 uj	

LOQ: limit of quantitation MB: method blank contamination MS: matrix spike and/or duplicate
ND: non-detect
Validation qualifiers applied: “u” (revised to ND); “uj” (estimated LOQ)

Case Narrative
TRC Companies, Inc.
Lot Number: WC12066

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Bromide

The following sample was diluted due to the nature of the sample matrix: WC12066-002. The LOQ has been elevated to reflect the dilution.

VOCs by GC/MS

The MS/MSD associated with batch 85788 recovered Methyl Bromide and Vinyl Chloride outside of method criteria due to suspected matrix interferences.

Dissolved Gasses

The analysis for Dissolved Gasses has been submitted to Pace Gulf Coast. This data will be submitted on a suplemental report.

Trichlorofluoromethane	75-69-4	8260D	ND		1.0	0.40	ug/L	1
Vinyl chloride	75-01-4	8260D	ND		1.0	0.40	ug/L	1
Xylenes (total)	1330-20-7	8260D	ND		1.0	0.40	ug/L	1

Surrogate	Q	Run 1 % Recovery	Acceptance Limits
Bromofluorobenzene		94	70-130
1,2-Dichloroethane-d4		86	70-130
Toluene-d8		91	70-130

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

QC Summary

Inorganic non-metals - MB

Sample ID: WQ85963-001
Batch: 85963
Analytical Method: 300.0
Matrix: Aqueous

Parameter	Result	Q	Dil	LOQ	DL	Units	Analysis Date
Sulfate	ND		1	1.0	0.25	mg/L	03/16/2021 1717

LOQ = Limit of Quantitation
DL = Detection Limit
ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☑ Yes	☐ No		21. Was the quote number listed on the container label? If yes, Quote # 24503

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/l. (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC12066** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221031719** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Six groundwater samples (plus one field duplicate), collected 11-Mar-2021 and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory noted that 1 vial (of 3) was received broken for each of two samples: RMW-10 and RMW-10C. Analyses were performed using the 2 remaining vials for each sample.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Methane (2.5 J µg/L) was detected in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases in all samples. **The positive results for methane in samples RMW-10A, RMW-10B, RMW-28B, and DU-21101 were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and are therefore potential false positives; these results were qualified "u" (revised to non-detect [ND]) at the laboratory LOQ, based on the associated laboratory method blank contamination.** Qualification was not required for the positive result for methane in sample RMW-10 since this result was significantly higher than (>5×) the method blank concentration, and qualification was not required for the ND results in the remaining samples (RMW-10C and RMW-28A).

Trip Blank: No target analytes were detected in the TB; analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide and sulfate using sample RMW-10A, and MS/MSD analyses were performed for VOCs using sample RMW-10. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS and MSD recoveries for bromomethane and vinyl chloride in sample RMW-10 were below the QC limits. **The ND results for bromomethane and vinyl chloride in sample RMW-10 was qualified "uj" (estimated LOQ) due to the low MS/MSD recoveries.**

- The MS/MSD RPD for acetone in sample RMW-10 was above the QC limit. Qualification was not required on this basis since acetone was ND in sample RMW-10.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was collected for sample RMW-10C. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, results are in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-10	bromide (5×), sulfate (10×), VOCs (5×)
RMW-10A	VOCs (10×)
RMW-28B	VOCs (50×)
RMW-28A	VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target (or non-target) analytes into the appropriate instrument calibration range. The ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values. The noted bromide and sulfate dilutions are associated only with positive results (detects).

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 24-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC12066 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-10A	methane	2.7 J [5.0]	u (@LOQ)	< 5.0	MB
RMW-10B		2.6 J [5.0]	u (@LOQ)	< 5.0	
RMW-28B		4.0 J [5.0]	u (@LOQ)	< 5.0	
DU-21101		2.6 J [5.0]	u (@LOQ)	< 5.0	
RMW-10	bromomethane	ND [10]	uj	< 10 uj	low MS recovery
	vinyl chloride	ND [5.0]	uj	< 5.0 uj	

LOQ: limit of quantitation MB: method blank contamination MS: matrix spike and/or duplicate
ND: non-detect
Validation qualifiers applied: “u” (revised to ND); “uj” (estimated LOQ)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221031719

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

No anomalies were found in the analyzed sample(s).

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC17120** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221031980** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Fifteen groundwater samples (plus one field duplicate), collected 12-Mar, 15-Mar, and 16-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory (relevant to the dissolved hydrocarbon gases analyses) noted low sample volume for the RMW-14C MS and MSD samples. MS/MSD analyses were performed using the noted sample; therefore, the volume was sufficient for the analyses. The MS and MSD results met applicable criteria; therefore, the noted low sample volumes do not appear to have had significant impact on the sample results. No validation action was taken on this basis.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- 1,2,4-Trichlorobenzene (0.42 J µg/L) was detected in the laboratory method blank associated with the VOC analysis in sample TBLK-21102. Qualification was not required on this basis since 1,2,4-trichlorobenzene was non-detect (ND) in this sample.

- Methane was detected in the two (of two) laboratory method blanks (2.8 J µg/L and 2.5 J µg/L) associated with the analysis of dissolved hydrocarbon gases; all samples were associated with one or the other of these two blanks. **The positive results for methane in samples RMW-06, RMW-13, RMW-13A, RMW-14, RMW-14A, and RMW-14B were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive result for methane in sample RMW-17A was > the LOQ but <5× the associated blank concentration; therefore, this result was also considered to be a potential false positive and was qualified "u" (revised to ND), with the LOQ revised to the reported sample concentration.** Qualification was

not required for the positive results for methane in samples RMW-07, RMW-09, RMW-16, RMW-16A, RMW-17, RMW-26, and DU-21102 since these results were significantly higher than (>5×) the method blank concentration, and qualification was not required for the ND results in the remaining samples (RMW-06A and RMW-14C).

Trip Blank: No target analytes were detected in the TB (TBLK-21102); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the following analyses using the indicated sample as the associated parent sample:

RMW-06	bromide and sulfate
RMW-14A	VOCs
RMW-14C	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-16	VOCs (tetrachloroethene only)

The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS/MSD RPD for acetone in sample RMW-14C was above the QC limit. Qualification was not required on this basis since acetone was ND in sample RMW-14C.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was collected for sample RMW-16A. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, results are in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-14A	VOCs (5×)
RMW-17A	VOCs (50×)
RMW-16	VOCs (5×) (tetrachloroethene only)
RMW-16A	VOCs (100×)
DU-21102	VOCs (50×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of RMW-16, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 24-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC17120 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-06	methane	2.7 J [5.0]	u (@LOQ)	< 5.0	MB (sc ≤ LOQ)
RMW-13		3.2 J [5.0]	u (@LOQ)	< 5.0	
RMW-13A		2.5 J [5.0]	u (@LOQ)	< 5.0	
RMW-14		3.4 J [5.0]	u (@LOQ)	< 5.0	
RMW-14A		2.5 J [5.0]	u (@LOQ)	< 5.0	
RMW-14B		2.7 J [5.0]	u (@LOQ)	< 5.0	
RMW-17A	methane	5.2 [5.0]	u (@ sc)	< 5.2	MB (LOQ < sc <5×MB)

LOQ: limit of quantitation MB: method blank contamination ND: non-detect
sc: sample concentration
Validation qualifiers applied: "u" (revised to ND)

Case Narrative
TRC Companies, Inc.
Lot Number: WC17120

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The method blank associated with batch 86185 yielded a "J" value detection for 1,2,4-Trichlorobenzene. No corrective action is required as this is an estimated value recovered below the LOQ.

The MSD associated with batch 86561 recovered Acetone above method criteria due to suspected matrix interferences.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Gulf Coast. This data is located on a separate report provided by Pace Gulf Coast.

Trichlorofluoromethane	75-69-4	8260D	ND		1.0	0.40	ug/L	1
Vinyl chloride	75-01-4	8260D	ND		1.0	0.40	ug/L	1
Xylenes (total)	1330-20-7	8260D	ND		1.0	0.40	ug/L	1

Surrogate	Q	Run 1 % Recovery	Acceptance Limits
Bromofluorobenzene		109	70-130
1,2-Dichloroethane-d4		110	70-130
Toluene-d8		116	70-130

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL
Q = Surrogate failure
L = LCS/LCSD failure
S = MS/MSD failure

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA _____ were received with bubbles >6 mm in diameter.

Samples(s) NA _____ were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC17120** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221031980** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Fifteen groundwater samples (plus one field duplicate), collected 12-Mar, 15-Mar, and 16-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory (relevant to the dissolved hydrocarbon gases analyses) noted low sample volume for the RMW-14C MS and MSD samples. MS/MSD analyses were performed using the noted sample; therefore, the volume was sufficient for the analyses. The MS and MSD results met applicable criteria; therefore, the noted low sample volumes do not appear to have had significant impact on the sample results. No validation action was taken on this basis.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- 1,2,4-Trichlorobenzene (0.42 J µg/L) was detected in the laboratory method blank associated with the VOC analysis in sample TBLK-21102. Qualification was not required on this basis since 1,2,4-trichlorobenzene was non-detect (ND) in this sample.

- Methane was detected in the two (of two) laboratory method blanks (2.8 J µg/L and 2.5 J µg/L) associated with the analysis of dissolved hydrocarbon gases; all samples were associated with one or the other of these two blanks. **The positive results for methane in samples RMW-06, RMW-13, RMW-13A, RMW-14, RMW-14A, and RMW-14B were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive result for methane in sample RMW-17A was > the LOQ but <5× the associated blank concentration; therefore, this result was also considered to be a potential false positive and was qualified "u" (revised to ND), with the LOQ revised to the reported sample concentration.** Qualification was

not required for the positive results for methane in samples RMW-07, RMW-09, RMW-16, RMW-16A, RMW-17, RMW-26, and DU-21102 since these results were significantly higher than (>5×) the method blank concentration, and qualification was not required for the ND results in the remaining samples (RMW-06A and RMW-14C).

Trip Blank: No target analytes were detected in the TB (TBLK-21102); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the following analyses using the indicated sample as the associated parent sample:

RMW-06	bromide and sulfate
RMW-14A	VOCs
RMW-14C	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-16	VOCs (tetrachloroethene only)

The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS/MSD RPD for acetone in sample RMW-14C was above the QC limit. Qualification was not required on this basis since acetone was ND in sample RMW-14C.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was collected for sample RMW-16A. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, results are in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-14A	VOCs (5×)
RMW-17A	VOCs (50×)
RMW-16	VOCs (5×) (tetrachloroethene only)
RMW-16A	VOCs (100×)
DU-21102	VOCs (50×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of RMW-16, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 24-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC17120 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-06	methane	2.7 J [5.0]	u (@LOQ)	< 5.0	MB (sc ≤ LOQ)
RMW-13		3.2 J [5.0]	u (@LOQ)	< 5.0	
RMW-13A		2.5 J [5.0]	u (@LOQ)	< 5.0	
RMW-14		3.4 J [5.0]	u (@LOQ)	< 5.0	
RMW-14A		2.5 J [5.0]	u (@LOQ)	< 5.0	
RMW-14B		2.7 J [5.0]	u (@LOQ)	< 5.0	
RMW-17A	methane	5.2 [5.0]	u (@ sc)	< 5.2	MB (LOQ < sc <5×MB)

LOQ: limit of quantitation MB: method blank contamination ND: non-detect
sc: sample concentration
Validation qualifiers applied: "u" (revised to ND)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221031980

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

MISCELLANEOUS

Sample 22103198007 (RMW-14C-MS) was received with a minimal volume of sample.

Sample 22103198008 (RMW-14C-MSD) was received with a minimal volume of sample.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC19051** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221032458** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Six groundwater samples, collected 18-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory (relevant to the dissolved hydrocarbon gases analyses) noted low sample volume for the RMW-23-MS and -MSD samples. MS/MSD analyses were performed using the noted sample; therefore, the volume was sufficient for the analyses.
- The subcontract laboratory noted some type of discrepancy between the sample labels / containers and the COC, but no further information was provided. The listed sample IDs, etc., agreed with those reported on the COC, so no action was required.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Methane was detected (2.9 J µg/L) in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases (associated with all samples). Qualification was not required on this basis since the positive results for methane in all samples were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21103); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide, sulfate, VOCs, and dissolved hydrocarbon gases using sample RMW-23 as the associated parent sample. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS and MSD recoveries for sulfate in sample RMW-23 (analysis batch 86597) were below the QC limits. The laboratory re-ran the MS/MSD analysis (batch 86728), using the same parent sample, and the recoveries in this analysis were both within the QC limits. Since the recoveries met criteria with the second analysis, profession judgement was used, and no validation action was taken on this basis.
- The MS and MSD recoveries for 3 VOCs were below the QC limits in sample RMW-23. **Therefore, the positive result for acetone in sample RMW-23 was qualified "j-" (estimated, with a potential low bias), and the non-detect (ND) results for 2-butanone and methyl acetate in this sample were qualified "uj" (estimated limit of quantitation [LOQ]).**
- The MS recovery for methane in sample RMW-23 was above the QC limits. The parent sample concentration of methane was >4× the MS spike amount; therefore, the MS recovery is considered unreliable, and the results are not usable for sample qualification. No validation action was taken on this basis.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was not collected with this sample set.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-23B	VOCs (20×) (cis-1,2-dichloroethene and tetrachloroethene only)
RMW-23C	VOCs (20×) (cis-1,2-dichloroethene and tetrachloroethene only)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. In the case of both dilutions listed above, the ND results in these samples were not associated with the dilution runs and were, therefore, not associated with elevated detection limit and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC19051 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-23	acetone	18 [20]	j-	18 J-	low MS recovery
	2-butanone	ND [10]	uj	< 10 UJ	
	methyl acetate	ND [1.0]	uj	< 1.0 UJ	

LOQ: limit of quantitation MS: matrix spike and/or duplicate ND: non-detect

Validation qualifiers applied: “j-“ (estimated, with a potential low bias); “uj” (estimated LOQ)

Case Narrative
TRC Companies, Inc.
Lot Number: WC19051

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Inorganic Non-Metals

Due to suspected matrix interferences, the MS/MSD associated with batch 86597 recovered Sulfate marginally outside of method criteria. Associated samples have been qualified with a "S".

VOCs by GC/MS

Due to suspected matrix interferences, the MS/MSD associated with batch 86597 recovered three compounds marginally outside of method criteria. Associated samples have been qualified with "S".

Subcontracted Analysis

The analysis of Dissolved Gasses has been performed by Pace Gulf Coast. This data is located on a separate report provided by them.

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL
Q = Surrogate failure
L = LCS/LCSD failure
S = MS/MSD failure

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC19051** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221032458** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Six groundwater samples, collected 18-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. The following sample receipt anomalies were noted:

- The subcontract laboratory (relevant to the dissolved hydrocarbon gases analyses) noted low sample volume for the RMW-23-MS and -MSD samples. MS/MSD analyses were performed using the noted sample; therefore, the volume was sufficient for the analyses.
- The subcontract laboratory noted some type of discrepancy between the sample labels / containers and the COC, but no further information was provided. The listed sample IDs, etc., agreed with those reported on the COC, so no action was required.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Methane was detected (2.9 J µg/L) in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases (associated with all samples). Qualification was not required on this basis since the positive results for methane in all samples were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21103); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide, sulfate, VOCs, and dissolved hydrocarbon gases using sample RMW-23 as the associated parent sample. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- The MS and MSD recoveries for sulfate in sample RMW-23 (analysis batch 86597) were below the QC limits. The laboratory re-ran the MS/MSD analysis (batch 86728), using the same parent sample, and the recoveries in this analysis were both within the QC limits. Since the recoveries met criteria with the second analysis, profession judgement was used, and no validation action was taken on this basis.
- The MS and MSD recoveries for 3 VOCs were below the QC limits in sample RMW-23. **Therefore, the positive result for acetone in sample RMW-23 was qualified "j-" (estimated, with a potential low bias), and the non-detect (ND) results for 2-butanone and methyl acetate in this sample were qualified "uj" (estimated limit of quantitation [LOQ]).**
- The MS recovery for methane in sample RMW-23 was above the QC limits. The parent sample concentration of methane was >4× the MS spike amount; therefore, the MS recovery is considered unreliable, and the results are not usable for sample qualification. No validation action was taken on this basis.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was not collected with this sample set.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-23B	VOCs (20×) (cis-1,2-dichloroethene and tetrachloroethene only)
RMW-23C	VOCs (20×) (cis-1,2-dichloroethene and tetrachloroethene only)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. In the case of both dilutions listed above, the ND results in these samples were not associated with the dilution runs and were, therefore, not associated with elevated detection limit and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC19051 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-23	acetone	18 [20]	j-	18 J-	low MS recovery
	2-butanone	ND [10]	uj	< 10 UJ	
	methyl acetate	ND [1.0]	uj	< 1.0 UJ	

LOQ: limit of quantitation MS: matrix spike and/or duplicate ND: non-detect

Validation qualifiers applied: “j-“ (estimated, with a potential low bias); “uj” (estimated LOQ)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221032458

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

VOLATILES GAS CHROMATOGRAPHY

In the AM20GAX analysis for analytical batch 707373, the MS/MSD recoveries are not applicable to Methane due to the high concentration of this analyte in the parent sample. The LCS/LCSD recoveries are acceptable.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC24065** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033041** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eighteen groundwater samples (plus one field duplicate), collected 19-Mar, 22-Mar, and 23-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Sulfate (0.25 J mg/L) was detected in the laboratory method blank associated with all groundwater samples. **The positive results for sulfate in samples RMW-05A and RMW-05B were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive results for sulfate in samples MG-05 and RMW-20C were > the LOQ but <5× the associated blank concentration; therefore, these results were qualified "j+" (estimated, with a potential high bias)**. Qualification was not required for the sulfate in the remaining samples since these results were ND or were significantly higher than (>5×) the method blank concentration.
- Methane (2.9 J µg/L) was detected in one of the laboratory method blanks associated with the analysis of dissolved hydrocarbon gases. **The positive results for methane in samples RMW-05A, RMW-19, and RMW-19A were > the LOQ but <5× the associated blank concentration; therefore, these results were considered to be potential false positives and were qualified "u" (revised to ND), with the LOQ for each revised to the reported sample concentration.** The positive result for methane in sample DU-21103 was also in this concentration range (>LOQ and <5× the blank); however, this sample is a field duplicate of sample RMW-27B, which reported a higher methane concentration (17 µg/L > 5× blank). Professional judgment was exercised in this

case, and no qualifier was applied to the DU-21103 methane result on the basis of method blank contamination. Qualification was not required for the positive results for methane in the remaining associated samples (RMW-05B, RMW-21, and RMW-21A) since these results were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21103); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the following analyses using the indicated sample as the associated parent sample:

MG-05A	VOCs
RMW-20A	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-21A	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-16	VOCs (tetrachloroethene only)

The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- Two VOC MS/MSD analyses were performed using sample RMW-20A. In the first set of MS/MSD analyses, the MS and MSD recoveries for cis-1,2-dichloroethene were outside the QC limits; however, the parent (RMW-20A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. The MSD recovery for acetone in this analysis was below the QC limits. It is noted that the stated parent sample concentrations for acetone and cis-1,2-dichloroethene in this MS/MSD analysis did not match the concentrations reported in the sample analysis summary because these 2 analytes were reported from a dilution run (Run 2) for this sample.

  A second set of MS/MSD analyses was performed using sample RMW-20A, but with this analysis, only acetone and cis-1,2-dichloroethene were reported, since these analytes were reported from Run 2 for this sample. In this MS/MSD analysis, the reported parent concentrations agreed with the sample analysis summary, and the spike concentration applied for cis-1,2-dichloroethene was comparable to the parent concentration; recoveries for both analytes were within QC limits. Based on these results, no validation action was taken for acetone or cis-1,2-dichloroethene in sample RMW-20A.

  The MS and MSD recoveries in sample RMW-20A for methyl acetate (only reported in the first MS/MSD analysis) were above the QC limits. **Therefore, the positive result for methyl acetate in sample RMW-20A was qualified "j+" (estimated, with a potential high bias).**

- In the VOCs MS/MSD analysis using sample RMW-21A, the MS recoveries for acetone, 2-butanone, and tetrachloroethene were below the QC limits. The MSD recoveries for all analytes were within the QC limits, but the MS/MSD RPDs for acetone, 2-butanone, methyl acetate, and 1,2,4-trichlorobenzene were above the QC limit. **The ND result for acetone in sample RMW-21A was qualified "uj" (estimated LOQ) based on the low MS recovery. The positive result for tetrachloroethene in this sample was qualified "j-" (estimated, with a potential low bias) based on the low MS recovery, the positive result for 2-butanone was qualified "j" (estimated) based on the low MS recovery and the elevated MS/MSD RPD, and the positive result for methyl acetate was qualified "j" (estimated) based on the elevated MS/MSD RPD.** Qualification was not required for 1,2,4-trichlorobenzene on the basis of the elevated MS/MSD RPD since this analyte was ND in sample RMW-21A.

- The MS and MSD recoveries for sulfate in sample RMW-20A were below the QC limits. **Therefore, the ND result for sulfate in sample RMW-20A was qualified "uj" (estimated LOQ).**

- The MSD recovery for sulfate in sample RMW-21A was below the QC limits; however, the parent (RMW-21A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. No validation action was taken on this basis.

- The MS and MSD recoveries for methane in sample RMW-20A were outside the QC limits; however, the parent (RMW-20A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. No validation action was taken on this basis.

- The MSD recoveries for ethane and methane in sample RMW-21A were below the QC limits. **The positive results for ethane and methane in sample RMW-21A were qualified "j-" (estimated, with a potential low bias) based on the low MSD recoveries.**

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21103) was collected for sample RMW-27B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ, with the exception of the following:

- The AbsD (8.4 µg/L) for the methane results in samples RMW-27B and DU-21103 exceeded the LOQ of 5.0 µg/L. **Therefore, the positive results for methane in samples RMW-27B and DU-21103 were qualified "j" (estimated).**

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-19A	VOCs (10×)
RMW-21A	VOCs (20×)
RMW-08A	VOCs (5×)
RMW-20A	VOCs (50×) (acetone and cis-1,2-dichlroethene only)
MG-05A	VOCs (5×)
RMW-27B	VOCs (5×)

RMW-27 VOCs (10×)

DU-21102 VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of RMW-20A, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC24065 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-05A	sulfate	0.71 J [1.0]	u (@LOQ)	< 1.0	MB (sc ≤ LOQ)
RMW-05B		0.51 J [1.0]	u (@LOQ)	< 1.0	
MG-05	sulfate	2.9 [1.0]	j+	2.9 J+	MB (LOQ< sc <5×MB)
RMW-20C		1.1 [1.0]	j+	1.1 J+	
RMW-05A	methane	8.4 [5.0]	u (@ sc)	< 8.4	MB (LOQ< sc <5×MB)
RMW-19		5.2 [5.0]		< 5.2	
RMW-19A		5.9 [5.0]		< 5.9	
RMW-20A	methyl acetate	10 [1.0]	j+	10 J+	high MS recovery
RMW-21A	acetone	ND [400]	uj	< 400 UJ	low MS recovery
RMW-21A	tetrachloroethene	2000 [20]	j-	2000 J-	low MS recovery
RMW-21A	2-butanone	110 J [200]	j	110 J	low MS recovery, RPD (MS)
RMW-21A	methyl acetate	9.7 J [20]	j	9.7 J	RPD (MS)
RMW-20A	sulfate	ND [1.0]	uj	< 1.0 UJ	low MS recovery
RMW-21A	ethane	1.6 [1.0]	j-	1.6 J-	low MS recovery
	methane	210 [5.0]	j-	210 J-	
RMW-27B	methane	17 [5.0]	j	17 J	FD comparison
DU-21103		8.6 [5.0]	j	8.6 J	

FD: field duplicate LOQ: limit of quantitation MB: method blank contamination MS: matrix spike and/or duplicate ND: non-detect RPD (MS): MS/MSD RPD sc: sample concentration

Validation qualifiers applied: "j" (estimated), "j-" / "j+" (estimated, with a potential low / high bias), "u" (revised to ND), "uj" (estimated LOQ)

Case Narrative
TRC Companies, Inc.
Lot Number: WC24065

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

Inorganic Non-Metals

The method blank associated with batch 87161 yielded a "J" value detection for Sulfate. No corrective action is required as this is an estimated value recovered below the LOQ. Associated detections have been qualified with a "B". The associated MS and MSD recovered this compound marginally below method criteria due to suspected matrix interferences. Associated samples have been qualified with a "S".

VOCs by GC/MS

The MS/MSD associated with batch 87247 and 87249 recovered multiple compounds outside of method criteria. Associated samples have been qualified with a "S".

Subcontracted Analysis

The analysis for Dissolved Gasses has been performed by Pace Gulf Coast. This data is located on a seperate report provided by them.

☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC24065** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033041** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eighteen groundwater samples (plus one field duplicate), collected 19-Mar, 22-Mar, and 23-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Sulfate (0.25 J mg/L) was detected in the laboratory method blank associated with all groundwater samples. **The positive results for sulfate in samples RMW-05A and RMW-05B were estimated concentrations below the limit of quantitation (LOQ) (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive results for sulfate in samples MG-05 and RMW-20C were > the LOQ but <5× the associated blank concentration; therefore, these results were qualified "j+" (estimated, with a potential high bias)**. Qualification was not required for the sulfate in the remaining samples since these results were ND or were significantly higher than (>5×) the method blank concentration.
- Methane (2.9 J µg/L) was detected in one of the laboratory method blanks associated with the analysis of dissolved hydrocarbon gases. **The positive results for methane in samples RMW-05A, RMW-19, and RMW-19A were > the LOQ but <5× the associated blank concentration; therefore, these results were considered to be potential false positives and were qualified "u" (revised to ND), with the LOQ for each revised to the reported sample concentration.** The positive result for methane in sample DU-21103 was also in this concentration range (>LOQ and <5× the blank); however, this sample is a field duplicate of sample RMW-27B, which reported a higher methane concentration (17 µg/L > 5× blank). Professional judgment was exercised in this

case, and no qualifier was applied to the DU-21103 methane result on the basis of method blank contamination. Qualification was not required for the positive results for methane in the remaining associated samples (RMW-05B, RMW-21, and RMW-21A) since these results were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21103); analyzed for VOCs only.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; the analyses for dissolved hydrocarbon gases also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the following analyses using the indicated sample as the associated parent sample:

MG-05A	VOCs
RMW-20A	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-21A	bromide, sulfate, VOCs, and dissolved hydrocarbon gases
RMW-16	VOCs (tetrachloroethene only)

The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the exception of the following:

- Two VOC MS/MSD analyses were performed using sample RMW-20A. In the first set of MS/MSD analyses, the MS and MSD recoveries for cis-1,2-dichloroethene were outside the QC limits; however, the parent (RMW-20A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. The MSD recovery for acetone in this analysis was below the QC limits. It is noted that the stated parent sample concentrations for acetone and cis-1,2-dichloroethene in this MS/MSD analysis did not match the concentrations reported in the sample analysis summary because these 2 analytes were reported from a dilution run (Run 2) for this sample.

  A second set of MS/MSD analyses was performed using sample RMW-20A, but with this analysis, only acetone and cis-1,2-dichloroethene were reported, since these analytes were reported from Run 2 for this sample. In this MS/MSD analysis, the reported parent concentrations agreed with the sample analysis summary, and the spike concentration applied for cis-1,2-dichloroethene was comparable to the parent concentration; recoveries for both analytes were within QC limits. Based on these results, no validation action was taken for acetone or cis-1,2-dichloroethene in sample RMW-20A.

  The MS and MSD recoveries in sample RMW-20A for methyl acetate (only reported in the first MS/MSD analysis) were above the QC limits. **Therefore, the positive result for methyl acetate in sample RMW-20A was qualified "j+" (estimated, with a potential high bias).**

- In the VOCs MS/MSD analysis using sample RMW-21A, the MS recoveries for acetone, 2-butanone, and tetrachloroethene were below the QC limits. The MSD recoveries for all analytes were within the QC limits, but the MS/MSD RPDs for acetone, 2-butanone, methyl acetate, and 1,2,4-trichlorobenzene were above the QC limit. **The ND result for acetone in sample RMW-21A was qualified "uj" (estimated LOQ) based on the low MS recovery. The positive result for tetrachloroethene in this sample was qualified "j-" (estimated, with a potential low bias) based on the low MS recovery, the positive result for 2-butanone was qualified "j" (estimated) based on the low MS recovery and the elevated MS/MSD RPD, and the positive result for methyl acetate was qualified "j" (estimated) based on the elevated MS/MSD RPD.** Qualification was not required for 1,2,4-trichlorobenzene on the basis of the elevated MS/MSD RPD since this analyte was ND in sample RMW-21A.

- The MS and MSD recoveries for sulfate in sample RMW-20A were below the QC limits. **Therefore, the ND result for sulfate in sample RMW-20A was qualified "uj" (estimated LOQ).**

- The MSD recovery for sulfate in sample RMW-21A was below the QC limits; however, the parent (RMW-21A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. No validation action was taken on this basis.

- The MS and MSD recoveries for methane in sample RMW-20A were outside the QC limits; however, the parent (RMW-20A) concentration for this analyte was over 4× the MS/MSD spike concentration. In this situation, MS/MSD recoveries are considered unreliable and are not usable for sample qualification. No validation action was taken on this basis.

- The MSD recoveries for ethane and methane in sample RMW-21A were below the QC limits. **The positive results for ethane and methane in sample RMW-21A were qualified "j-" (estimated, with a potential low bias) based on the low MSD recoveries.**

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21103) was collected for sample RMW-27B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ, with the exception of the following:

- The AbsD (8.4 µg/L) for the methane results in samples RMW-27B and DU-21103 exceeded the LOQ of 5.0 µg/L. **Therefore, the positive results for methane in samples RMW-27B and DU-21103 were qualified "j" (estimated).**

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-19A	VOCs (10×)
RMW-21A	VOCs (20×)
RMW-08A	VOCs (5×)
RMW-20A	VOCs (50×) (acetone and cis-1,2-dichlroethene only)
MG-05A	VOCs (5×)
RMW-27B	VOCs (5×)

RMW-27 VOCs (10×)

DU-21102 VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of RMW-20A, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC24065 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
RMW-05A	sulfate	0.71 J [1.0]	u (@LOQ)	< 1.0	MB (sc ≤ LOQ)
RMW-05B		0.51 J [1.0]	u (@LOQ)	< 1.0	
MG-05	sulfate	2.9 [1.0]	j+	2.9 J+	MB (LOQ< sc <5×MB)
RMW-20C		1.1 [1.0]	j+	1.1 J+	
RMW-05A	methane	8.4 [5.0]	u (@ sc)	< 8.4	MB (LOQ< sc <5×MB)
RMW-19		5.2 [5.0]		< 5.2	
RMW-19A		5.9 [5.0]		< 5.9	
RMW-20A	methyl acetate	10 [1.0]	j+	10 J+	high MS recovery
RMW-21A	acetone	ND [400]	uj	< 400 UJ	low MS recovery
RMW-21A	tetrachloroethene	2000 [20]	j-	2000 J-	low MS recovery
RMW-21A	2-butanone	110 J [200]	j	110 J	low MS recovery, RPD (MS)
RMW-21A	methyl acetate	9.7 J [20]	j	9.7 J	RPD (MS)
RMW-20A	sulfate	ND [1.0]	uj	< 1.0 UJ	low MS recovery

	methane	210 [5.0]	j-	210 J-	
RMW-27B	methane	17 [5.0]	j	17 J	FD comparison
DU-21103		8.6 [5.0]	j	8.6 J	

FD: field duplicate LOQ: limit of quantitation MB: method blank contamination MS: matrix spike and/or duplicate ND: non-detect RPD (MS): MS/MSD RPD sc: sample concentration

Validation qualifiers applied: "j" (estimated), "j-" / "j+" (estimated, with a potential low / high bias), "u" (revised to ND), "uj" (estimated LOQ)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221033041

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

VOLATILES GAS CHROMATOGRAPHY

In the AM20GAX analysis for analytical batch 707373, the MS and/or MSD exhibited recovery failures. All LCS/LCSD recoveries are acceptable.

In the AM20GAX analysis for analytical batch 707570, the MS/MSD recoveries are not applicable to Methane due to the high concentration of this analyte in the parent sample. The LCS/LCSD recoveries are acceptable.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC25080** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033043** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eighteen groundwater samples (plus one field duplicate), collected 23-Mar and 24-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

It was noted that the field duplicate sample (DU-21104) was labeled as "DUP-21104" in the subcontract report for dissolved hydrocarbon gases analysis. This discrepancy is noted, but no validation action was taken on this basis.

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one of the VOCs laboratory method blanks. **The positive result for carbon disulfide in the TB sample (TBLK-21110) was an estimated concentration below the limit of quantitation (LOQ) (J-qualified by the laboratory) and was therefore a potential false positive; this result was qualified "u" (revised to non-detect [ND]) at the laboratory LOQ, based on the associated laboratory method blank contamination.** Qualification was not required for the 1,2,4-trichlorobenzene result in the TB or for either analyte in the remaining associated sample (DPT-24) since these results were ND.
- Carbon disulfide (0.42 J µg/L) was detected in one of the other VOCs laboratory method blanks. Qualification was not required on this basis since carbon disulfide was ND in the associated samples (DPT-24, DPT-24B, and DU-21104).
- Methane (2.7 J µg/L) was detected in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases in all samples. **The positive results for methane in samples DPT-27, DPT-27A, DPT-27B, DPT-26A, DPT-25A, and DPT-24A were estimated concentrations**

below the LOQ (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive results for methane in samples DPT-26B and DPT-25B were > the LOQ but <5× the associated blank concentration; therefore, these results were considered to be potential false positives and were qualified "u" (revised to ND), with the LOQ for each revised to the reported sample concentration. Qualification was not required for the positive results for methane in the remaining samples since these results were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21110) (analyzed for VOCs only), with the exception of the following:

- Carbon disulfide (0.52 J µg/L) was detected in the TB; however, this result was qualified "u" (revised to ND) based on associated method blank contamination. No further evaluation of the reported TB contamination was required.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: Two MS/MSD analyses were performed for the VOCs using samples DPT-27 and DPT-27B as the associated parent samples. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21104) was collected for sample DPT-24B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, the field duplicate results were in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

DPT-27	VOCs (10×)
DPT-27A	VOCs (10×)
DPT-27B	VOCs (5×)
DPT-26	VOCs (5×) (tetrachloroethene only)
DPT-26A	VOCs (50×)
DPT-26B	VOCs (100×)
DPT-25A	VOCs (5×)
DPT-25B	VOCs (10×)
DPT-24A	VOCs (20×)
DPT-24B	VOCs (5×)

DU-21104 VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of DPT-26, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC25080 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
TBLK-21110	carbon disulfide	0.52 J [1.0]	u (@LOQ)	< 1.0	MB (TB≤ LOQ)
DPT-27	methane	4.8 J [5.0]	u (@LOQ)	< 5.0	MB (sc ≤ LOQ)
DPT-27A		3.5 J [5.0]		< 5.0	
DPT-27B		3.2 J [5.0]		< 5.0	
DPT-26A		4.2 J [5.0]		< 5.0	
DPT-25A		4.9 J [5.0]		< 5.0	
DPT-24A		4.5 J [5.0]		< 5.0	
DPT-26B	methane	10 [5.0]	u (@sc)	< 10	MB (LOQ< sc < 5×MB)
DPT-25B		8.2 [5.0]		< 8.2	

LOQ: limit of quantitation MB: method blank contamination ND: non-detect sc: sample concentration
TB: trip blank
Validation qualifiers applied: “u” (revised to ND)

Case Narrative
TRC Companies, Inc.
Lot Number: WC25080

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The method blank associated with analytical batch 87673 yielded "J" value detections for Carbon Disulfide and 1,24-Trichlorobenzene. In addition, the method blank associated with batch 87848 yielded a "J" value detection for 1,2,4-Trichlorobenzen. No corrective action is required as there were no associated detections above the LOQ. Associated samples have been qualified with a "B".

Subcontracted Analysis

The analysis of Dissolved Gasses has been performed by Pace Gulf Coast. This data is on a separate report provided by Pace Gulf Coast.

Vinyl chloride	75-01-4	8260D	ND		20	8.0	ug/L	1
Xylenes (total)	1330-20-7	8260D	ND		20	8.0	ug/L	1

Surrogate	Q	Run 1 % Recovery	Acceptance Limits
Bromofluorobenzene		102	70-130
1,2-Dichloroethane-d4		93	70-130
Toluene-d8		102	70-130

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL
Q = Surrogate failure
L = LCS/LCSD failure
S = MS/MSD failure

Toluene	108-88-3	8260D	ND		1.0	0.40	ug/L	1

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL
Q = Surrogate failure
L = LCS/LCSD failure
S = MS/MSD failure

Client: TRC Companies, Inc.
Description: TBLK-21110
Date Sampled: 03/24/2021
Date Received: 03/25/2021

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC25080** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033043** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eighteen groundwater samples (plus one field duplicate), collected 23-Mar and 24-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

It was noted that the field duplicate sample (DU-21104) was labeled as "DUP-21104" in the subcontract report for dissolved hydrocarbon gases analysis. This discrepancy is noted, but no validation action was taken on this basis.

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one of the VOCs laboratory method blanks. **The positive result for carbon disulfide in the TB sample (TBLK-21110) was an estimated concentration below the limit of quantitation (LOQ) (J-qualified by the laboratory) and was therefore a potential false positive; this result was qualified "u" (revised to non-detect [ND]) at the laboratory LOQ, based on the associated laboratory method blank contamination.** Qualification was not required for the 1,2,4-trichlorobenzene result in the TB or for either analyte in the remaining associated sample (DPT-24) since these results were ND.
- Carbon disulfide (0.42 J µg/L) was detected in one of the other VOCs laboratory method blanks. Qualification was not required on this basis since carbon disulfide was ND in the associated samples (DPT-24, DPT-24B, and DU-21104).
- Methane (2.7 J µg/L) was detected in the laboratory method blank associated with the analysis of dissolved hydrocarbon gases in all samples. **The positive results for methane in samples DPT-27, DPT-27A, DPT-27B, DPT-26A, DPT-25A, and DPT-24A were estimated concentrations**

below the LOQ (J-qualified by the laboratory) and were therefore potential false positives; these results were qualified "u" (revised to ND) at the laboratory LOQ, based on the associated laboratory method blank contamination. The positive results for methane in samples DPT-26B and DPT-25B were > the LOQ but <5× the associated blank concentration; therefore, these results were considered to be potential false positives and were qualified "u" (revised to ND), with the LOQ for each revised to the reported sample concentration. Qualification was not required for the positive results for methane in the remaining samples since these results were significantly higher than (>5×) the method blank concentration.

Trip Blank: No target analytes were detected in the TB (TBLK-21110) (analyzed for VOCs only), with the exception of the following:

- Carbon disulfide (0.52 J µg/L) was detected in the TB; however, this result was qualified "u" (revised to ND) based on associated method blank contamination. No further evaluation of the reported TB contamination was required.

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: Two MS/MSD analyses were performed for the VOCs using samples DPT-27 and DPT-27B as the associated parent samples. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21104) was collected for sample DPT-24B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ; therefore, the field duplicate results were in acceptable agreement.

Dilutions: The following sample analyses were performed with dilution, as indicated:

DPT-27	VOCs (10×)
DPT-27A	VOCs (10×)
DPT-27B	VOCs (5×)
DPT-26	VOCs (5×) (tetrachloroethene only)
DPT-26A	VOCs (50×)
DPT-26B	VOCs (100×)
DPT-25A	VOCs (5×)
DPT-25B	VOCs (10×)
DPT-24A	VOCs (20×)
DPT-24B	VOCs (5×)

DU-21104 VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of DPT-26, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 26-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC25080 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
TBLK-21110	carbon disulfide	0.52 J [1.0]	u (@LOQ)	< 1.0	MB (TB≤ LOQ)
DPT-27	methane	4.8 J [5.0]	u (@LOQ)	< 5.0	MB (sc ≤ LOQ)
DPT-27A		3.5 J [5.0]		< 5.0	
DPT-27B		3.2 J [5.0]		< 5.0	
DPT-26A		4.2 J [5.0]		< 5.0	
DPT-25A		4.9 J [5.0]		< 5.0	
DPT-24A		4.5 J [5.0]		< 5.0	
DPT-26B	methane	10 [5.0]	u (@sc)	< 10	MB (LOQ< sc < 5×MB)
DPT-25B		8.2 [5.0]		< 8.2	

LOQ: limit of quantitation MB: method blank contamination ND: non-detect sc: sample concentration
TB: trip blank
Validation qualifiers applied: “u” (revised to ND)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221033043

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

No anomalies were found for the analyzed sample(s).

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC27001** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033046** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eight groundwater samples, collected 24-Mar-2021 and 25-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one of the VOCs laboratory method blanks, associated only with the TB in this sample set. Qualification was not required on this basis since these analytes were ND in the TB.
- 1,2,4-Trichlorobenzene (0.42 J µg/L) was detected in another of the VOCs laboratory method blanks, associated with all of the groundwater samples. Qualification was not required on this basis since this analyte was ND in the associated samples.

Trip Blank: No target analytes were detected in the TB (TBLK-21104) (analyzed for VOCs only).

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the bromide, sulfate, VOCs, and dissolved hydrocarbon gases using sample MG-06B as the associated parent sample. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the following exception:

- The MSD recovery for tetrachloroethene in sample MG-06B was above the QC limits; however, the parent sample concentration (530 µg/L) was over 4× the spike concentration (50 µg/L). In this situation (parent > 4× spike) the recovery results are considered unreliable and are not usable for sample qualification. Np validation action was taken on this basis.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was not collected with this sample set.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-02	VOCs (5×)
MG-06B	VOCs (10×) (tetrachloroethene only)
RMW-18	VOCs (5×) (cis-1,2-dishloroethene and tetrachloroethene only)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of MG-06B and RMW-18, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

No validation qualifiers were applied in this review.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 28-Apr-2021

Case Narrative
TRC Companies, Inc.
Lot Number: WC27001

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The method blank associated with analytical batch 87673 containes Carbon Disulfide and 1,24-Trichlorobenzene greater than method criteria. The data has been reported as all associated samples are non-detect for these compounds.

Due to suspected matrix interferences, the MS/MSD associated with batch 87848 recovered Tetrachloroethene outside of method criteria.

Dissolved Gasses

The analysis for dissolved gasses has been performed by Pace Gulf Coast. This data has been ammended to this report beginning at page 56.

Samples Receipt Checklist (SRC) (ME0018C-15)
Issuing Authority: Pace ENV - WCOL

Revised:9/29/2020
Page 1 of 1

Sample Receipt Checklist (SRC)

Client: TRC Cooler Inspected by/date: MEH / 3/27/2021 Lot #: WC27001

Means of receipt: ☑ Pace ☐ Client ☐ UPS ☐ FedEx ☐ Other:

☐ Yes	☑ No		1. Were custody seals present on the cooler?
☐ Yes	☐ No	☑ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: _____ Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

6.0 / 6.0 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☑ Yes	☐ No		21. Was the quote number listed on the container label? If yes, Quote # 24503

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA _____ were received with bubbles >6 mm in diameter.

Samples(s) NA _____ were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

ANALYTICAL RESULTS

PERFORMED BY

Pace Analytical Gulf Coast
7979 Innovation Park Dr.
Baton Rouge, LA 70820
(225) 769-4900

Report Date 04/08/2021

Report # 221033046

Project WC27001 WPH Clemson

Deliver To	***Additional Recipients***
Lucas Odom Pace Analytical Services South Carolina 106 Vantage Point Drive West Columbia, SC 29172 803 791 9700	NONE

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221033046

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

No anomalies were found for the analyzed sample(s).

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC27001** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033046** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Eight groundwater samples, collected 24-Mar-2021 and 25-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one of the VOCs laboratory method blanks, associated only with the TB in this sample set. Qualification was not required on this basis since these analytes were ND in the TB.
- 1,2,4-Trichlorobenzene (0.42 J µg/L) was detected in another of the VOCs laboratory method blanks, associated with all of the groundwater samples. Qualification was not required on this basis since this analyte was ND in the associated samples.

Trip Blank: No target analytes were detected in the TB (TBLK-21104) (analyzed for VOCs only).

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for the bromide, sulfate, VOCs, and dissolved hydrocarbon gases using sample MG-06B as the associated parent sample. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the following exception:

- The MSD recovery for tetrachloroethene in sample MG-06B was above the QC limits; however, the parent sample concentration (530 µg/L) was over 4× the spike concentration (50 µg/L). In this situation (parent > 4× spike) the recovery results are considered unreliable and are not usable for sample qualification. Np validation action was taken on this basis.

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate was not collected with this sample set.

Dilutions: The following sample analyses were performed with dilution, as indicated:

RMW-02	VOCs (5×)
MG-06B	VOCs (10×) (tetrachloroethene only)
RMW-18	VOCs (5×) (cis-1,2-dishloroethene and tetrachloroethene only)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. With the exception of MG-06B and RMW-18, the ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

No validation qualifiers were applied in this review.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 28-Apr-2021

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221033046

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

No anomalies were found for the analyzed sample(s).

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC29029** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033158** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Twelve groundwater samples (plus one field duplicate), collected 25-Mar and 26-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one VOCs laboratory method blank, associated only with the TB sample**.** Qualification was not required since these analytes were non-detect (ND) in the TB.

Trip Blank: No target analytes were detected in the TB (TBLK-21111).

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide, sulfate, and VOCs using sample DPT-20B as the associated parent sample, and a second set of MS/MSD analyses were performed for bromide and sulfate using sample DPT-21. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the following exception:

- The MSD recovery for sulfate in sample DPT-21 was slightly below the QC limits. **Therefore, the positive results for sulfate were qualified "j-" (estimated, with a potential low bias), and the ND results were qualified "uj" (estimated LOQ).**

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21105) was collected for sample DPT-21B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ, with the following exceptions:

- The calculated field duplicate RPDs for ethane and methane in samples DPT-21B and DU-21105 (33% and 38%, respectively) exceeded the QC limit of 30%. **Therefore, the DPT-21B and DU-21105 results for ethane and methane were qualified "j" (estimated).**

Dilutions: The following sample analyses were performed with dilution, as indicated:

DPT-23A	VOCs (5×)
DPT-22	VOCs (5×)
DPT-22A	VOCs (20×)
DPT-22B	VOCs (5×)
DPT-20	VOCs (5×)
DPT-20A	VOCs (50×)
DPT-20B	VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. The ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 28-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC299029 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
DPT-23	sulfate	0.81 J [1.0]	j-	0.81 J-	low MS recovery
DPT-22		45 [1.0]		45 J-	
DPT-22A		0.37 J [1.0]		0.37 J-	
DPT-22B		0.35 J [1.0]		0.35 J-	
DPT-21		16 [1.0]		16 J-	
DPT-21A		0.51 J [1.0]		0.51 J-	
DPT-21B		0.33 J [1.0]		0.33 J-	
DU-21105		0.43 J [1.0]		0.43 J-	
DPT-20		38 [1.0]		38 J-	
DPT-20A		1.1 [1.0]		1.1 J-	
DPT-20B		6.8 [1.0]		3.8 J-	
DPT-23A, DPT-23B		ND [1.0]	uj	< 1.0 UJ	
DPT-21B	ethane	12 [1.0]	j	12 J	FD comparison
DU-21105		8.6 [1.0]		8.6 J	
DPT-21B	methane	280 [5.0]	j	280 J	FD comparison
DU-21105		190 [5.0]		190 J	

FD: field duplicate LOQ: limit of quantitation MS: matrix spike and/or duplicate ND: non-detect

Validation qualifiers applied: “j” (estimated); “j-“ (estimated, with a potential low bias); “uj” (estimated LOQ)

Case Narrative
TRC Companies, Inc.
Lot Number: WC29029

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved The NELAC Institute (TNI) standards, the Pace Analytical Services, LLC ("Pace") Laboratory Quality Manual, standard operating procedures (SOPs), and Pace policies. Any exceptions to the TNI standards, the Laboratory Quality Manual, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Pace Project Manager listed on the cover page.

VOCs by GC/MS

The method blank associated with analytical batch 87673 contained Carbon Disulfide and 1,24-Trichlorobenzene greater than method criteria. No corrective action is required as all associated samples are non-detect for these compounds.

Inorganic Non-Metals

The MSD associated with batch 87985 recovered Sulfate marginally outside of method criteria due to suspected matrix interferences.

Dissolved Gasses

The analysis for Dissolved Gasses has been performed by Pace Gulf Coast. This data is on a separate reported provided by Pace Gulf Coast.

Trichlorofluoromethane	50	47		1	93	70-130	04/07/2021 0903
Vinyl chloride	50	48		1	95	70-130	04/07/2021 0903
Xylenes (total)	100	100		1	100	70-130	04/07/2021 0903

Surrogate	Q	% Rec	Acceptance Limit
Bromofluorobenzene		96	70-130
1,2-Dichloroethane-d4		86	70-130
Toluene-d8		95	70-130

LOQ = Limit of Quantitation
DL = Detection Limit
ND = Not detected at or above the DL
J = Estimated result < LOQ and ≥ DL
* = RSD is out of criteria
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☐ Yes	☐ No	☑ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☐ Yes	☑ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH3/TKN/cyanide/phenol/625.1/608.3 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA. Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L. (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Laboratory Data Quality Review Notes

Project Name: WPH-Clemson, SC

Project Number: 300688.0000.0000 Phase 11

Lab Report: **WC29029** Pace Analytical Services, LLC (formerly Shealy Environmental Services, Inc.), West Columbia, SC; subcontracted report: **221033158** Pace Analytical Gulf Coast, Baton Rouge, LA

Samples and Analyses: Twelve groundwater samples (plus one field duplicate), collected 25-Mar and 26-Mar-2021, and analyzed for volatile organic compounds (VOCs), bromide, and sulfate; one trip blank (TB), analyzed for VOCs only. Analysis of the groundwater samples for dissolved hydrocarbon gases (ethane, ethene, methane) was subcontracted and was reported separately (as noted above).

Chain of Custody, Sample Temperature, Sample Preservation: Chain of custody (COC) forms were signed; cooler temperature was ≤6 ^{o}C upon arrival at each laboratory; samples were preserved properly. No sample receipt anomalies were noted.

Holding Time: Sample analyses were performed within acceptable holding times.

Surrogates: VOC surrogate recoveries were within laboratory quality control (QC) limits.

Method Blank: Laboratory method blanks were appropriately associated with all analyses. The following target analytes were detected in the laboratory method blanks:

- Carbon disulfide (0.44 J µg/L) and 1,2,4-trichlorobenzene (0.64 J µg/L) were detected in one VOCs laboratory method blank, associated only with the TB sample**.** Qualification was not required since these analytes were non-detect (ND) in the TB.

Trip Blank: No target analytes were detected in the TB (TBLK-21111).

Field Blank: A field blank was not collected with these samples.

Equipment Rinse Blank: An equipment rinse blank was not collected with these samples.

LCS/LCSD: LCS analyses were performed appropriately for all analyses; some analytical or preparation batches also included analysis of LCSD samples. The LCS and LCSD recoveries and LCS/LCSD relative percent differences (RPDs) were within the laboratory QC limits.

MS/MSD: MS/MSD analyses were performed for bromide, sulfate, and VOCs using sample DPT-20B as the associated parent sample, and a second set of MS/MSD analyses were performed for bromide and sulfate using sample DPT-21. The MS and MSD recoveries and MS/MSD RPDs were within QC criteria, with the following exception:

- The MSD recovery for sulfate in sample DPT-21 was slightly below the QC limits. **Therefore, the positive results for sulfate were qualified "j-" (estimated, with a potential low bias), and the ND results were qualified "uj" (estimated LOQ).**

Duplicates: No laboratory duplicates were included with these analyses. A field duplicate (DU-21105) was collected for sample DPT-21B. Duplicate RPDs were calculated for analytes detected above 5× the LOQ in both samples; the absolute difference (AbsD) was used to evaluate analytes detected below 5× the LOQ in one or both samples. RPD values were ≤ 30%, and AbsD values were ≤LOQ, with the following exceptions:

- The calculated field duplicate RPDs for ethane and methane in samples DPT-21B and DU-21105 (33% and 38%, respectively) exceeded the QC limit of 30%. **Therefore, the DPT-21B and DU-21105 results for ethane and methane were qualified "j" (estimated).**

Dilutions: The following sample analyses were performed with dilution, as indicated:

DPT-23A	VOCs (5×)
DPT-22	VOCs (5×)
DPT-22A	VOCs (20×)
DPT-22B	VOCs (5×)
DPT-20	VOCs (5×)
DPT-20A	VOCs (50×)
DPT-20B	VOCs (5×)

The laboratory reports did not indicate the dilution reason(s), but the dilutions appear to have been performed in order to bring the concentrations of target analytes into the appropriate instrument calibration range. The ND results in the noted VOC analyses were associated with correspondingly elevated detection limit (DL) and LOQ values.

Validation qualifiers were applied in this review, as summarized in the following table.

Data Reviewer: Amy Bass; TRC Environmental Corporation; 28-Apr-2021

Summary of qualifiers assigned by the data quality reviewer.

WC299029 **Sample ID**	**Analyte**	**Lab Result [LOQ]**	**Qualifier Assigned**	**Qualified Result**	**Basis**
DPT-23	sulfate	0.81 J [1.0]	j-	0.81 J-	low MS recovery
DPT-22		45 [1.0]		45 J-	
DPT-22A		0.37 J [1.0]		0.37 J-	
DPT-22B		0.35 J [1.0]		0.35 J-	
DPT-21		16 [1.0]		16 J-	
DPT-21A		0.51 J [1.0]		0.51 J-	
DPT-21B		0.33 J [1.0]		0.33 J-	
DU-21105		0.43 J [1.0]		0.43 J-	
DPT-20		38 [1.0]		38 J-	
DPT-20A		1.1 [1.0]		1.1 J-	
DPT-20B		6.8 [1.0]		3.8 J-	
DPT-23A, DPT-23B		ND [1.0]	uj	< 1.0 UJ	
DPT-21B	ethane	12 [1.0]	j	12 J	FD comparison
DU-21105		8.6 [1.0]		8.6 J	
DPT-21B	methane	280 [5.0]	j	280 J	FD comparison
DU-21105		190 [5.0]		190 J	

FD: field duplicate LOQ: limit of quantitation MS: matrix spike and/or duplicate ND: non-detect

Validation qualifiers applied: “j” (estimated); “j-“ (estimated, with a potential low bias); “uj” (estimated LOQ)

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with Pace Gulf Coast's Standard Operating Procedures.

Common Abbreviations that may be Utilized in this Report

ND	Indicates the result was Not Detected at the specified reporting limit
NO	Indicates the sample did not ignite when preliminary test performed for EPA Method 1030
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
DL	Detection Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
RE	Re-analysis
CF	HPLC or GC Confirmation
00:01	Reported as a time equivalent to 12:00 AM

Reporting Flags that may be Utilized in this Report

J or I	Indicates the result is between the MDL and LOQ
J	DOD flag on analyte in the parent sample for MS/MSD outside acceptance criteria
U	Indicates the compound was analyzed for but not detected
B or V	Indicates the analyte was detected in the associated Method Blank
Q	Indicates a non-compliant QC Result (See Q Flag Application Report)
*****	Indicates a non-compliant or not applicable QC recovery or RPD – see narrative
E	Organics - The result is estimated because it exceeded the instrument calibration range
E	Metals - % diference for the serial dilution is > 10%
L	Reporting Limits adjusted to meet risk-based limit.
P	RPD between primary and confirmation result is greater than 40
DL	Diluted analysis – when appended to Client Sample ID

Sample receipt at Pace Gulf Coast is documented through the attached chain of custody. In accordance with NELAC, this report shall be reproduced only in full and with the written permission of Pace Gulf Coast. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with The NELAC Institute (TNI) Standard 2009 and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

Estimated uncertainty of measurement is available upon request. This report is in compliance with the DOD QSM as specified in the contract if applicable.

Case Narrative

Client: Pace Analytical Services South Carolina **Report:** 221033158

Pace Analytical Gulf Coast received and analyzed the sample(s) listed
on the Report Sample Summary page of this report. Receipt of the sample(s) is documented
by the attached chain of custody. This applies only to the sample(s) listed in this report.
No sample integrity or quality control exceptions were identified unless noted below.

No anomalies were found for the analyzed sample(s).

SAMPLE RECEIVING CHECKLIST

SAMPLE DELIVERY GROUP 221033158	
Client **PM** RWe Shealy Envir - Pace Analytical Services South Carolina	**Transport Method** FEDEX
Profile Number 290459	**Received By** Jenkins, Mark A.
Line Item(s) 1 - MEE	**Receive Date(s)** 03/31/21

CHECKLIST	YES	NO
Samples received with proper thermal preservation?	☑	☐
Radioactivity is <1600 cpm? If no, record cpm value in notes section.	☑	☐
COC relinquished and complete (including sampleIDs, collect times, and sampler)?	☑	☐
All containers received in good condition and within hold time?	☑	☐
All sample labels and containers received match the chain of custody?	☑	☐
Preservative added to any containers?	☐	☑
If received, was headspace for VOC water containers < 6mm?	☑	☐
Samples collected in containers provided by Pace Gulf Coast?	☑	☐
