BUREAU OF WATER  
WATER QUALITY DIVISION

Dear Mr Wenerick;

I am writing this letter on behalf of the Andrew Hyman heirs. We are opposed to the pipeline that Dominion Energy wants to put in Pamlico. The people there use well water, and they use electricity to run the pumps. In fact electricity is the main source of energy. Our concern is that over a period of time, the pipelines could possibly crack or burst, and seep into the ground which could possibly cause contamination. My family grows gardens, some have live stock, and if the wells get contaminated it would be devastating. No one knows what illness they might be subjected to until it is too late.

Reetta L. Hyman Jefferson
