Influenza-Like Illness Surveillance

This week, the ILI activity level was **high** and 7.7% of patient visits to SC ILINet providers was attributed to an influenza-like illness. This is above the state baseline, 3.53%.

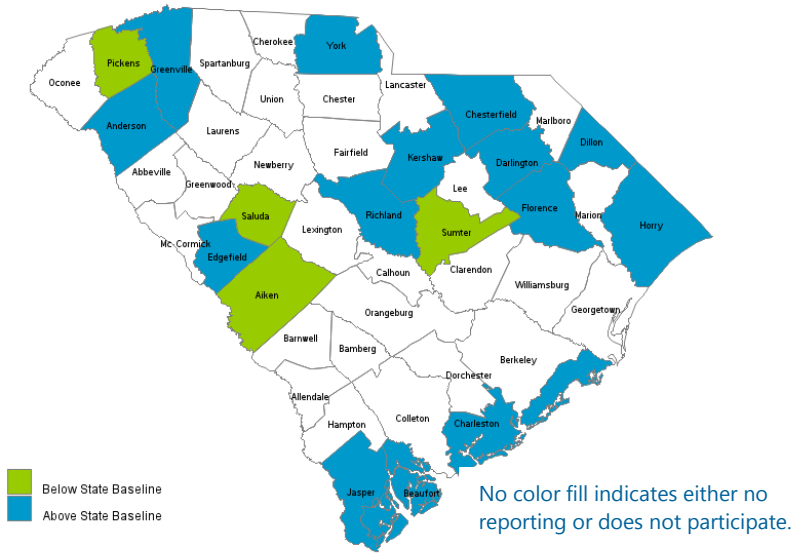

Reports were received from providers in 18 counties, representing all DHEC Public Health regions.

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
